

Press Release

CTT Systems AB receives order from Fokker Services on Cair™ system for one A319 VIP aircraft

Nyköping, Sweden, December 5, 2013, – Fokker Services B.V., based in Holland, has ordered CTT Cair™ System to be installed in one Airbus A319 VIP aircraft. The installation will be performed during spring/summer 2014.

"We are very pleased to once again work with CTT for our new outfitting project on a VIP A319 aircraft. We have already installed the Cair™ system in one ACJ319 VIP aircraft. We are thoroughly convinced of the added value of the Cair™ system for Fokker Services VIP customers" says Maurice Burghouwt, Account Manager Procurement of Fokker Services."

"This is the second order we have won from Fokker and we are delighted to continue working with them on this new aircraft" says Peter Landquist, Vice President Sales & Marketing of CTT Systems.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 "Dreamliner" and CTT's humidifiers are options in crew rest compartments and on the flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 450 systems installed in more than 30 airlines worldwide. CTT has now 20 years of operating experience on the Zonal Drying™ system plus 14 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
