2013 was a good year for the stock market. In spite of a watchful global economy, the market has been driven by high expectations for future corporate profits and the SIX Return Index climbed by a full 28 per cent. Bure's listed holdings also enjoyed a successful year. All in all, our listed portfolio companies rose by over 61 per cent in 2013. The largest contributors were Vitrolife, Micronic Mydata and Xvivo. This has naturally affected Bure's net asset value in a positive direction. Adjusted for dividends, net asset value per share grew by 25.5 per cent in 2013.

The composition of the portfolio changed somewhat during 2013. A new portfolio company is MedCap, in which Bure is the single largest shareholder since the first quarter. Furthermore, in the past year we divested most of our holdings in Theeducation. This sale marks the end of Bure's nearly 15-year involvement in the independent school sector.

During the year Bure set up an investment committee whose task is to generate a return on Bure's net cash, at a low risk, until new portfolio company investments are made. The investments consist mainly of fixed income funds and liquid listed shares. Despite a cautious strategy, it is encouraging to see that this management has produced a return of more than 13 per cent.

We have also experienced negative developments in 2013, which has led to the recognition of impairment losses. Mercuri's drop in earnings is a disappointment. In the second half of the year additional measures were taken to turn this loss around. Leasing of locomotives to Trätåg's timber transports was started during the year. The transport system is developing according to plan, although the train operator RushRail, in which we have a non-controlling interest, is having financial difficulties.

Finally, the portfolio company Micronic Mydata's board has proposed that the AGM will approve an extraordinary dividend for the year. In the Board's opinion, part of this dividend should be distributed to Bure's shareholders. Against this background, and in addition to the ordinary dividend of 0.50 SEK per share, the Board intends to propose that the AGM of Bure approve an extraordinary dividend of SEK 0.50 per share.

Key events

- Leasing of electric locomotives commenced on 1 January 2013. Leasing operations and the locomotives have functioned well in the transport system of the end user Trätåg (StoraEnso and Billerud Korsnäs).
- In mid-December, Investment AB Bure's customer RushRail filed for a corporate reconstruction. The customer has had significant financial difficulties, primarily during the autumn following a customer bankruptcy at the beginning of 2013. In view of the reconstruction procedure, Investment AB Bure made provisions for accounts receivable of SEK 10.7M in the fourth quarter.
- Investment AB Bure has secured future flows after the customer's initiated reconstruction, and since the middle of December receives payment in advance. Contingency plans have been drawn up to allow for different possible outcomes of the reconstruction.
- Bure's assessment of these operations remains positive. There are major future opportunities for leasing of electric locomotives. Increased demand for effective locomotive resources and a weak supply, together with a low level of investment in new locomotives are a few factors underpinning this potential.

Bure's loss carryforwards	<p>In the third quarter Bure acquired 3.57 million shares in Vigmed Holding AB (publ), listed on NASDAQ OMX First North, in a directed issue for an amount of SEK 25.0M. Following the transaction, Bure holds 9.5 per cent of the company.</p> <p>At the end of 2013 the Bure Group had total loss carryforwards of approximately SEK 671M, of which around SEK 481M referred to the Parent Company. As a result of the merger with Skanditek Industriförvaltning, which took place in 2010, loss carryforwards of SEK 110M were transferred to the Parent Company. The loss carryforwards in the Parent Company will be suspended until the end of 2015 in respect of the merger between Bure and Skanditek. The loss carryforwards in the subsidiaries will be available to offset against taxable profits in certain wholly owned subsidiaries. The deferred tax asset based on loss carryforwards in the Group has been valued at SEK 14M (20).</p>
Currency exposure	<p>Most of the Group's revenue is denominated in SEK and EUR. The underlying costs are normally generated in the same currency as revenues, which means that transaction exposure is limited. Since the Group has investments outside Sweden via its subsidiaries, the consolidated balance sheet and income statement are exposed to translation differences arising on the translation of the foreign subsidiaries' accounts.</p>
Ownership structure	<p>Bure's largest shareholders at 31 December 2013 were Nordea Investment Funds with 13.0 per cent, Dag Tigerschiöld with 11.4 per cent, Patrik Tigerschiöld with 7.3 per cent and the Björkman family with 6.5 per cent. The number of shareholders amounted to 18,955 at 31 December 2013. For more information about Bure's shareholders visit www.bure.se under the heading "Investor Relations/Shareholders".</p>
Bure Equity's 2014 AGM	<p>The Board Chairman has convened a nominating committee made up of members representing the largest shareholders in Bure Equity AB. The nominating committee consists of Jesper Grünbaum, representing the Tigerschiöld family, Peter Rudman, representing Nordea Investment Funds, and Per Björkman, representing the Björkman family. In addition, the committee includes Patrik Tigerschiöld, Chairman of Bure Equity AB. The nominating committee has been appointed in accordance with the instructions adopted by the 2013 AGM. The nominating committee together represents 38.2 per cent of the number of votes for all voting shares in the company.</p> <p>The Board proposes that the AGM approve an ordinary dividend of SEK 0.50 per share (0.30) and an extraordinary dividend of SEK 0.50 per share (0).</p>
Related party transactions	<p>No transactions with related parties have taken place during 2013.</p>
Significant risks and uncertainties	<p>In view of rapid changes in the financial markets, a special emphasis is placed on monitoring the effects of these on Bure's investments and their valuations. Bure has a number of basic principles for management of risks. Bure's finance policy states that the Parent Company shall be essentially debt-free. Furthermore, each portfolio company shall be financially independent from the Parent Company, which means that the Parent Company is not financially liable for obligations in the portfolio companies and that the companies are responsible for their own financing arrangements. Financing of the respective portfolio company shall be well adapted to each company's individual situation, where total risk is managed through a balanced spread between operational and financial risk. For a more detailed description of the Group's risk exposure and risk management, see the administration report and Note 21 of Bure's annual report for 2012. Bure's assessment is that no significant risks have arisen other than those described in the annual report and this interim report.</p>

This year-end report has not been examined by the company's auditors.

Accounting policies

Bure applies International Financial Reporting Standards (IFRS) as endorsed for application in the EU. This interim report has been prepared in compliance with IAS 34, Interim Financial Reporting, the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2, Accounting for Legal Entities. No changes have taken place in the Group's accounting and valuation principles compared to those described in Note 1 of the annual report for 2012. The new and revised standards, interpretations and improvements that have been endorsed by the EU for application as of 1 January 2013 have not had any significant impact on the consolidated financial statements in 2013.

NOTE 1 – SEGMENT REPORTING

Reporting by operating segment

Bure has adopted the new IFRS 8 standard for reporting of operating segments. Since Bure has previously accounted for segments in a similar manner, the new standard has not given rise to any changes in the basis for segmentation or in calculation of profit/loss in the segments compared to the most recently published annual report. Consolidation adjustments relating to positive and negative goodwill have been attributed to the respective companies. Transactions between the various segments are insignificant in scope and are equal to less than 0.1 per cent of total sales. Dormant companies or companies not classified as portfolio companies are reported under the heading "Other companies". For a description of the respective companies' operations, see pages 4 – 7.
