Aarsleff and Køge Municipality enter into partnering contract on extension of Køge Harbour

Over the coming 10-12 years Køge Municipality and Aarsleff in partnering are to extend a large area around Køge Harbour at an estimated value of DKK 950 million.

The extensive construction work is part of Køge Municipality's plan for the near-shore areas at the harbour. The harbour itself is currently under heavy development and the extension possibilities for the industrial and harbour areas are limited.

Therefore, a 40-hectare landfill consisting of polluted soil from the Greater Copenhagen area will be established. Furthermore a new and bigger dock will be established.

The coming contracting works around the harbour comprise, among other things:

- Establishing and running the landfill.
- Receipt of two million cubic metres of lightly and medium polluted soil to constitute the 40-hectare fill.
- Establishing two new jetties and driving of sheet piles to enclose the landfill.
- Extension and improvement of the recreational areas to the north and south of Køge Harbour.

The final closing of contract does not give rise to a change in the outlook for the profit for the financial year 2006/2007.
