#### Financial assets and liabilities

NAXS's financial instruments consist of fund investments, cash and cash equivalents and accounts payable. Level 3 investments includes only the Company's publicly traded share of the fund holdings / securities of unlisted companies (in some cases, also listed companies). When observable prices are not available for these securities, the fund manager uses one or more valuation techniques (e.g. yield methods or income-based methods), or a combination of techniques, for which sufficient and reliable data are available. Within Level 3, the market approach generally uses earnings multiples of comparable companies, while the income-based approach generally uses the present value of estimated future cash flows, adjusted for liquidity, credit, market and/or other risk factors.

For NAXS, the book value of all financial assets and liabilities corresponds to fair value. All amounts are shown in the reported balance sheets.
