MANAGEMENT REPORT

Type of Business Activity

Valmieras stikla šķiedra JSC and its subsidiaries (hereinafter – Valmiera Glass Group or the Group) is one of the leading glass fibre manufacturers in Europe, with more than 80 years of experience in textile processing and more than 50 years of experience in fiberglass production. Valmiera Glass Group's core business areas are glass fibre research, glass fibre product development, production and trade.

During the reporting period Valmiera Glass Group consisted of the holding company Valmieras stikla šķiedra JSC and its subsidiaries Valmiera Glass UK Ltd. in the United Kingdom, P-D Valmiera Glass USA Corp. (former — Valmiera Glass USA Corp.) and Valmiera Glass USA Trading Corp. in the United States. In 2016, the Valmiera Glass USA Corp. changed its name to "P-D Valmiera Glass USA Corp." based on the concluded agreement from 12 September 2016, for selling 33% of Valmiera Glass USA Corp. shares to P-D Management Industries-Technologies GmbH. The aim of the said transaction was to acquire P-D Management Industries-Technologies GmbH as an investor for the further development of the US production plant in connection with the next stage of investments in the company.

Valmiera Glass Group is the only group in the world with a vertically integrated structure and a wide range of glass fibre products for the thermal insulation market with a temperature resistance up to 1250 °C.

The Group's holding company Valmieras stikla šķiedra JSC specializes in manufacturing glass fibre and glass fibre products using three different types of glass: E-glass with a temperature resistance of 600+°C, HR-glass with a temperature resistance of 800+°C and SiO₂-glass with a temperature resistance of 1000+°C. The glass fibre production of Valmieras stikla šķiedra JSC is used for further processing, in technical (electrical, thermal and acoustic) insulation materials and as finished materials in mechanical engineering, construction, and elsewhere.

The subsidiary Valmiera Glass UK Ltd. produces fiberglass products for the aviation industry, thermal insulation and architecture, while P-D Valmiera Glass USA Corp. produces non-woven glass fibre materials or glass fibre mat, which are most commonly used as thermal and acoustic insulation materials in the automotive industry, shipbuilding, power plants, construction, production of household appliances, etc.

Quality Management

All the companies of the Valmiera Glass Group operate in accordance with the Quality Management System Standard ISO 9001. The parent company of Valmiera Glass Group, Valmieras stikla šķiedra JSC, is certified in accordance with the requirements of Energy Management Standard ISO 50001 and Environment Management Standard ISO 14001:2004.

Markets

In the first 6 months of 2017, products made by Valmieras stikla šķiedra JSC were exported to 42 countries around the world, with its export volume reaching 97%. In the first half of 2017, the Group continued to strengthen its positions in the existing markets. The key export markets of

the products remained unchanged: European Union countries (76%), North America (13%), CIS (4%) and other export countries (7%).

From a product segment perspective, sales have increased for high added-value products, such as high-concentration SiO₂ glass fibre products with heat resistance of 1000+°C and E-glass fabrics with heat resistance of 600°C. In the first half year 2017, on average, the sales of these products grew by 12% compared to the same period in 2016. For other product segments the sales amount is valuated as stable or with a small growth.

Employees

In first 6 months 2017, the Valmiera Glass Group employed on average 1308 employees, of which the average number of employees employed by Valmieras stikla šķiedra JSC alone was 1114. In some period the subsidiary company Valmiera Glass UK Ltd. employed on average 144 employees, and the subsidiary P-D Valmiera Glass USA Corp. had on average 50 employees.

Investments

The main focus of the investment activity of the first half year 2017 was the provision of the own funds for the financing of the project in the USA. As budgeted at the Valmiera and Sherborne sites, only maintenance investments or investments in the stabilization of glass production were carried out.

Thus, at the Valmiera site, the melting capacity of silica glass was increased and measures were taken to achieve the full melting capacity of the glass melting furnace 1.2.

The large-scale project in the USA, which began in 2016, was continued on schedule. Both the project costs and the project schedule are in budget. The building has been built around 50% and the first installation work for the equipment and the technology has started according to the project plan.

The focus of the project work of the next months will be dedicated to the budget maintenance of the necessary professional staff. Since June, the first American employees in the field of glass melting and maintenance have been trained in our Latvian plant. These employees have previously had several months' training in the technical college in Dublin/GA.

After several months of negotiations, on 27.03.2017 a financing contract EUR 52 million with the two Latvian banks for the investment project was concluded. As of June 30, 2017, the first stage of the equity contribution of EUR 15.5 million was provided, so that on 13.07.2017 the first disbursement of the loan was carried out.

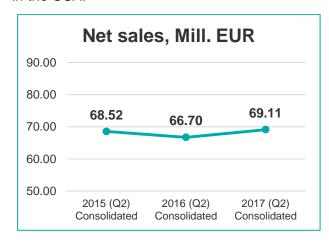

With this loan agreement, the company has also committed itself to new covenants, which also apply to existing financing agreements in Latvia.

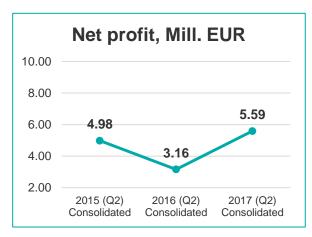

The largest investment project in the history of Valmieras stikla šķiedra JSC was initiated – the expansion of US-based manufacturing facility. Until 2022, it is expected to create 425 new job places and to invest 80 million EUR from our own financial resources by also attracting loans from banks. The expansion will enable the Group to acquire even greater manufacturing capacity and stability, and to increasingly successfully meet the growing market demand for glass fibre products.

Financial results

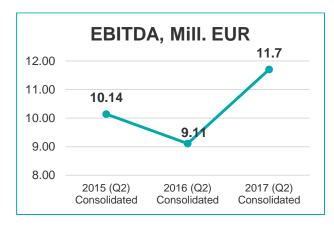

The consolidated net sales of the Group in the first half year 2017 has reached EUR 69.11 Million. Compared to the EUR Mill. 66,7 the same period 2016 it remain on the same high level, given the strong performance of sales in all principal markets and the limitation of sales growth through limited production capacities up to the commissioning of the melting plant in the USA.

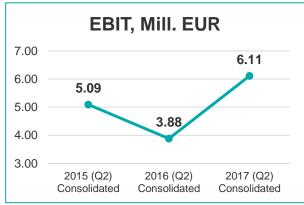

The consolidated operating profit (EBITDA) was EUR 11.7 Million, which is EUR 2.6 Million or 28% higher than in the first half year 2016. The EBITDA margin increased as well to 17.5% from 14% in 2016.

The earnings before interest and taxes (EBIT) reached EUR 6.11 Million which is EUR 2.23 Million or 57% more than in the first 6 month 2016.

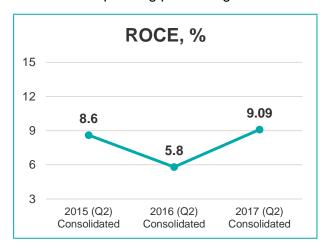

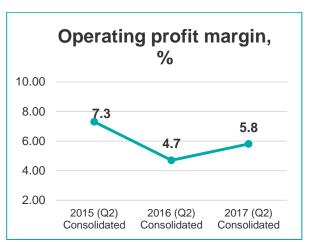

The consolidated operating profit margin ratio by end of June 2017 was 8.7%

Consolidated Pre-tax profit of the reporting period reached EUR 6.03 Million marking as well significant growth of EUR 2.47 million from EUR 3.56 million in same time 2016.

The consolidated return on capital (ROCE) of the first 6 month 2017 is 9.09% whereas the consolidated operating profit margin ratio of six month 2016 was 5.8%.

The consolidated net profit of the Group by end of June 2017 was EUR 5.59 million, or EUR 2.43 million more compared to the unaudited net profit of the Group of the same period in 2016.

The significant higher profit compared to 2016 is the result of higher production output of four furnaces, sales price increments and positive currency exchange rates.

Considering the ongoing positive growth trends in the global glass fibre market, the stable capacity of the world's fibreglass industry, and the notably high demand for glass fibre products, the management of the joint stock company predicts that the Group's consolidated net sales in 2017 will reach EUR 130 million, and the consolidated net profit of EUR 9.0 million.

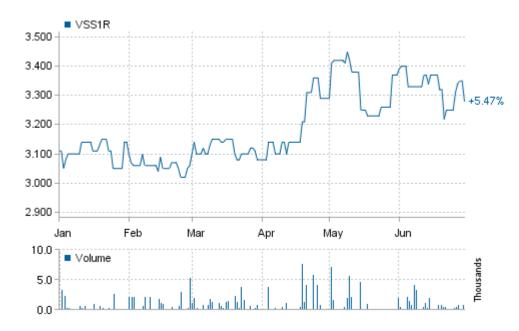

The achievement of these results for fiscal year 2017 depends on the full utilisation of the production capacities of the melting furnaces, a stable sales at a high level at all sites and a flexible cost adjustment of material costs and personnel costs to the total output. For this purpose, the management has launched appropriate programs and projects.

Stock Market

The shares of Valmieras stikla šķiedra JSC have been listed on the Nasdaq Riga Secondary List since 24 February 1997.

Valmieras stikla šķiedra JSC share price development in the first half year 2017 (data of Nasdaq Riga)

During the first half year of 2017, the share price grew by 5.47%. In the reporting period, the share price fluctuated between EUR 2.92 (lowest share price) and EUR 3.45 (highest share price). In this period, the average share price was EUR 3.19.

Valmieras stikla šķiedra JSC share price in the first half year 2017 in comparison with OMX Baltic Benchmark GI and OMX Riga index (data Nasdaq Riga)

The number of shares traded during the first 6 months of 2017 exceeded 128 thousand, and the turnover of shares of Valmieras stikla šķiedra JSC reached EUR 0.41 million. During the reporting period, 425 transactions were made with shares of Valmieras stikla šķiedra JSC.
