Notes to the financial statement

Report on the Management Board's responsibility to the non-audited financial statement of JSC "VEF" for the three months of 2009

Management Board of JSC "VEF" (hereinafter – the Company) is responsible for preparation of the middle-term financial statements of the Company. The middle-term financial statements are not audited.

Middle-term financial statements are prepared based on justifying documents and represent true and clear overview on the Company's Assets and Equity and Liabilities, its financial standing and results of activity as well as cash flows within the reporting period ended on march 31, 2009.

Middle-term financial statements are prepared according to the EU approved International Standards of financial reports and observing principle of continuing business activity. Accounting principles used in preparation of the middle-term financial statements have not been changed comparing to the previous reporting period. During preparation of the middle-term financial statements decisions taken by the Management Board and estimations made have been cautious and well-founded. The information included in the middle-term management's report is true.

The Management Board of the Company is responsible for ensuring the corresponding accounting system, securing the assets of the Company, as well as for prevention and exposure of fraud and other violation within the Company.

On behalf of the Management Board of JSC "VEF",

Gints Feņuks Chairman of the Management Board

JSC VEF FINANCIAL STATEMENTS' APPENDIXES FOR YEAR, WHICH ENDS ON MARCH 31, 2009

1. ACCOUNTING AND ASSESSMENT METHODS – COMMON PRINCIPLES

Basis for financial statements preparation

Financial statements are being prepared in compliance with Latvian laws "On bookkeeping" and "On the Annual Accounts of Undertakings".

Profit and losses account is prepared according to the turnover method. Accounting policy provides the financial statements give information that is appropriate for their users to make decisions and conclusions. The policy is reliable. The financial statements correctly reveal the financial condition and operating results of the company – showing not only legal side of transactions, but also their economical matter, and are complete in all essential aspects.

Accounting principles used

The items of the financial statements are valued according to the following accounting principles:

- a) it is assumed that the company will operate in the future;
- b) assessment methods used are the same as used in the previous financial year;
- c) assessment is made with mere caution:
 - only profit earned before the date of the annual report is included in the financial statements
 - all projected risk amounts and losses that appeared in the financial year or in the previous years are taken into account, even those which became known in the period of time between the date of the annual report and the day when the financial statements are drawn up
 - all value decreases and depreciation amounts are calculated and taken into account, regardless of the financial year result (profit or losses)
- d) revenues and expenditures connected with the financial year are taken into account, regardless of payment date and invoice receiving or writing out date;
- e) assets and liabilities and net worth items have been assessed independently;
- f) the initial balance sheet of the financial year coincides with the previous financial year final balance sheet;
- g) all items that have an essential influence on the financial statements' users evaluation or decision taking have been taken into account, non-significant items have been combined and they are shown in details in the appendixes to the financial statements;
- h) business operations during the financial year are shown by their economical content and nature instead of their legal form.

Financial year

Financial year is 03 months, from 01.01.2009 to 31.03.2009.

Money and foreign currency revaluation

Amounts shown in these financial statements are in Latvian national currency - lats (LVL). All monetary assets and liabilities are recalculated to lats, using the official exchange rate of the Latvian Bank that is set on the last day of the financial year.

Long-term and short-term items

Long-term items include amounts, whose receiving, discarding or payment terms become due more than 1 year after the end of the respective financial year. Amounts that are due to be received, paid or discarded during the next year, are included in short-term items.

Fixed assets and nonmaterial investment depreciation

Fixed assets and non-material investments are shown by purchase price minus depreciation. Depreciation is calculated on the straight-line basis, using as a basis the following rates:

Fixed assets	
Property	1%
Equipment and machinery	20%
Other fixed assets	25%

Income tax

Income tax for the financial year consists of calculated tax and deferred tax. Income tax is included in the profit and losses account.

Income tax for the financial year is calculated according to the law" On the income tax of Undertakings", determining taxable income and using 15% rate, set by the law.

Deferred income tax is calculated for the difference between assets and liabilities value in the financial statements and assets and liabilities value for tax purposes. Deferred income tax is calculated using 15% rate, set by the law. The above-mentioned difference mainly comes from the different fixed assets depreciation rates used in the financial and tax accounting. Increase of provisions for bad receivables is not taken into account, calculating deferred income tax, due to mere caution principle.

Credit line

There is a credit JSC "SEB banka". It is included in the long-term and short-term liabilities and the balance at the end of the financial period is 2 545 809 LVL (3 622 360 EUR).

(1) Net turnover

Turnover consists of revenues that the Company gained in the first three months of 2009 from its core business-service provision without VAT
