- Profit for the year of DKK 880m before tax
- Increase in lending of DKK 31bn
- Total lending of DKK 222bn
- Market share continues to increase
- Income/cost ratio improved by 50% since 2002

Nordea Kredit Realkreditaktieselskab posted a profit for the year of DKK 880m before tax. After tax the profit was DKK 633m since tax is recognised in the annual report as it was in the annual report for 2005. In previous years the tax expense was paid by Nordea Bank Danmark A/S in accordance with the current rules on joint taxation.

The substantial growth in lending, almost on a par with the growth in 2005, was achieved despite a lower level of activity than in the previous year. While 2005 was characterised by very high mortgage refinancing activity, traditional refinancing activities have by and large not taken place in 2006 due to the development in interest rates. As a result activity-related fees and commissions fell by approximately DKK 140m.

Due to increasing short-term interest rates during 2006 the return on investment was DKK 361m against DKK 293m in 2005. Nordea Kredit is still only exposed to negligible interest rate risks.

Expenses increased by approximately 3% compared to the previous year. The income/cost ratio of 5.64 – an increase of approximately 50% since 2002 – reflects the ongoing improvement of efficiency in Nordea Kredit, among other things, as a result of the implementation of Lean.

Total loan losses were DKK 5m compared with DKK 2m in the previous year. The increase in loan losses concerns one single commitment.

During the year Nordea Kredit repossessed 3 properties and sold 6. At 31 December the portfolio of repossessed properties was 1, booked at DKK 0.6m.

The share capital was increased by DKK 154m at a price of DKK 649 per share on 30 October 2006, bringing the total capital ratio, including the profit for the year, to 10.1% at the end of 2006 against the statutory minimum of 8%.

Nordea Kredit – five-year financial summary

	2002	2003	2004	2005	2006
Income statement (DKK m)

Average number of employees	119	123	124	130	131

Ratios and key figures have been computed in accordance with the Danish Financial Supervisory Authority's definitions.

No events have occurred after the balance sheet date which materially affect the financial position of the company.

Results in the second half-year exceeded the expectations announced in connection with the release of the interim report for the first half of 2006, mainly as a result of rising short-term interest rates, leading to an increased return on investment.

Lending

In 2006 lending increased by DKK 31bn, or more than 16%, to a total of DKK 221.8bn.

Lending for residential properties and holiday homes was DKK 171.1bn at the end of 2006, an increase of DKK 21.8bn compared to 2005. Commercial property lending increased from DKK 41.5bn at the end of 2005 to DKK 50.7bn at the end of 2006. Of this figure loans for agricultural properties accounted for DKK 25.8bn at the end of 2006 against DKK 22.1bn in 2005.

At the year-end total lending by Nordea Kredit accounted for 11.9% of total mortgage lending in Denmark, an increase of 0.6% point compared to the previous year. The progress was made in all customer segments, but in particular the market share has increased significantly within lending to corporate customers.

Nordea Kredit has again strengthened its position as the third largest mortgage lender in Denmark.

Refinancing

Refinancing of adjustable-rate mortgages took place in December at a five-day auction as regards one-year adjustable-rate mortgages. The interest rate for 2007 was fixed at 4.11% compared to 2.89% in 2006. Other adjustable-rate mortgages were refinanced at a one-day auction.

Although the interest rate increased significantly, only approximately 10% of customers with one-year adjustable-rate mortgages changed either the adjustment frequency or changed to a fixed-rate loan.

Outlook for 2007

Nordea Kredit expects to see continued growth in lending to all customer segments.

Results for 2007 are expected to exceed results for 2006 by approximately DKK 100m – assuming an unchanged interest rate level.

Annual General Meeting

The Board of Directors will propose to the Annual General Meeting, which will be held on 9 March 2007 in Copenhagen, that the profit for the year after tax of DKK 633m should be transferred to equity and that no dividend should be paid for 2006.

Nordea Kredit expects to announce its half-year results on 19 July 2007.

Accounting policies

General

The financial statements of Nordea Kredit have been prepared in accordance with the Danish Financial Business Act, the Executive Order on financial reports for credit institutions etc (the Executive Order), the Copenhagen Stock Exchange's rules on the issuance of listed bonds, and generally accepted accounting principles.

No changes have been made to the accounting policies compared to the annual report for 2005.

The balance sheet items, mortgage loans and mortgage bonds in issue, are measured at fair value in accordance with the Executive Order and this measurement is a deviation from the rules in article 42a of the Fourth Company Directive (78/660/EEC) with a view to giving a true and fair view of the assets, liabilities and results.

Comparative figures

Pursuant to the commencement provision in the Executive Order the comparative figures for 2004 and earlier have been prepared in accordance with former accounting policies as regards financial assets and liabilities, including mortgage loans, mortgage bonds in issue and the portfolio of own bonds and interest.

Recognition and derecognition of financial instruments

Financial assets and financial liabilities are recognised in the balance sheet when Nordea Kredit becomes a party to the contractual provisions of the financial instruments.

A financial asset is derecognised from the balance sheet when the contractual right to the cash flow from the financial asset expires or the financial asset is sold.

A financial liability is derecognised from the balance sheet when the liability is extinguished, ie when the liability is settled, cancelled or expires pursuant to the contract.

As a result of the recognition criteria listed securities, currency transactions and derivatives in the trading portfolio are recognised and derecognised on the trade date, while transactions outside the trading portfolio are recognised and derecognised on the settlement date.

Foreign currencies

The functional currency of Nordea Kredit is Danish kroner (DKK).

Transactions made in another currency than the functional currency are translated into the functional currency at the exchange rate prevailing on the date of the transaction.

At the balance sheet date balance sheet items are translated at the official closing rate of the Danish central bank at the

balance sheet date, and all adjustments resulting from changes in the exchange rate are recognised in the income statement.

Taxation

Tax on operating profit

The tax for the year, consisting of the current tax for the year and change in deferred tax, is recognised in the income statement with the share attributable to the profit for the year and directly in equity with the share attributable to movements directly in equity.

Corporation tax and deferred tax

Current tax liabilities and current tax receivable are recognised in the balance sheet as calculated tax on the taxable income for the year adjusted for tax on previous years' taxable income and on account tax paid.

Deferred tax is measured under the balance-sheet liability method of all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In those cases, for instance, concerning shares where the determination of the tax base can be made according to alternative taxation rules deferred tax is measured on the basis of the planned use of the asset or the settlement of the liability, respectively.

Deferred tax assets, including the tax base of tax loss carry-forwards, are measured at the value at which they are expected to be realised, either by elimination in tax on future earnings or by setoff against deferred tax liabilities within the same legal tax entity.

Deferred tax is measured on the basis of the tax rules and tax rates that will be effective under the legislation at the balance sheet date when the deferred tax is expected to be realised as current tax. Changes in deferred tax as a result of changes in tax rates are recognised in the income statement.

Nordea Kredit has charged tax on loan losses to the income statement.

Repo and reverse transactions

Securities sold under agreements to repurchase at a later date (repos) remain in the balance sheet. The purchase price received is entered as a liability owed to the transferee and carries interest as agreed. The securities are revalued, as if the securities were still held.

Securities purchased under agreements to resell at a later date (reverse repos) are not recorded in the balance sheet under the securities portfolio and any profit or loss arising thereon is not taken to the income statement. The purchase

price paid is included as balances due from counterparties and carries interest as agreed.

Financial assets

Loans and receivables at fair value

Mortgage loans are measured at fair value, corresponding to the current market price at the balance sheet date. If impairment of loans and receivables or a group hereof can be objectively identified, provisions for loan losses are made, corresponding to the impairment.

Loans and receivables at amortised cost

Other loans which are not included in the calculation of statutory balance between mortgage loans and mortgage bonds in issue, are measured at amortised cost.

Bonds at fair value

Listed securities are measured at fair value, corresponding to the current market price at the balance sheet date. Changes in fair value are recognised directly in the income statement. The portfolio of own mortgage bonds is offset against mortgage bonds in issue. Interest receivable on own bonds is similarly offset against interest payable under the item Other liabilities in the balance sheet.

Derivatives

Derivatives comprise spot transactions and forward contracts. Derivatives are measured at fair value.

Shares etc

Shares are measured at fair value.

Shares in associated undertakings

Shares in associated undertakings are stated at net asset value. Other significant holdings of shares are measured at fair value.

Intangible assets

IT software and development expenses are recognised as assets if they are major investments with an expected useful life exceeding three years, expected to generate future economic benefits and not to be regarded as replacement investments or maintenance.

Amortisation of intangible assets is provided on a straight-line basis over a maximum period of 20 years. Intangible assets concerning projects in progress are not amortised until the individual projects have been concluded.

Tangible assets

Machinery and equipment are recognised at cost adjusted for any depreciation and write-downs made.

Depreciation is made on the basis of a conservative estimate of the asset's useful life.

If the value of the assets is lower and the impairment in value is not considered temporary, such assets are entered at the lower value.

Machinery and equipment are depreciated systematically over a maximum period of five years. Assets of less than DKK 11,000 are fully depreciated in the year of acquisition, except for assets acquired as part of a specific project, which are treated as one asset. The maximum amount allowed follows the tax limit for immediate write-offs (DKK 11,000 in 2005).

Temporarily repossessed properties

Repossessed properties are included in the item Temporarily repossessed assets. The item comprises own loans and prior claims of other mortgagees as well as other cash outlays etc transferred from the item Loans and receivables at fair value. The item is reduced by provisions for losses on these properties.

Financial liabilities

Mortgage bonds in issue

Mortgage bonds in issue are measured at fair value, corresponding to the current market price at the balance sheet date. Announced scheduled payments for the next payment date are measured at the discounted value.

The portfolio of own mortgage bonds is offset against mortgage bonds in issue.

Pension obligations

Pension obligations are covered either in an independent pension fund or through an insurance company. Nordea Kredit has no further pension obligations towards the staff.

Ratios and key figures

Ratios and key figures are listed in the five-year financial summary in compliance with the schedule to the Executive Order.

Cash flow statement

The cash flow statement shows cash flows broken down by operating, investing and financing activities for the year, changes in cash and cash equivalents for the year as well as cash and cash equivalent as at the beginning and end of the year.

Cash flows from operating activities are determined as profit before tax adjusted for non-cash operating items, changes in working capital, interest paid and corporation tax paid.

Cash flows from investing activities comprise the purchase and sale of intangible, tangible and other long-term assets as well as the purchase and sale of securities not included as cash and cash equivalents.

Cash flows from financing activities comprise changes in the size or composition of the share capital.

Cash and cash equivalents comprise balances due from credit institutions and central banks.

Notes

Note 11 Tax

For 2004 and earlier the company was jointly and severally liable together with the other jointly taxed companies.

As from the accounting period 2005 the company is jointly and severally liable for that part of the tax of the jointly taxed income concerning Nordea Kredit until payment to the management company in the Nordea Group has taken place.

The company has a liability for deferred tax of DKK 9.2m computed on the basis of the company's own financial statements and own tax circumstances. Tax on the profit for the year amounted to DKK 243.5m.

Guarantees		
Nordea Kredit's parent company, Nordea Bank Danmark A/S, provides on an ongoing basis 5- and 10-year guarantees to cover the top 25% of the principal of mortgage loans disbursed	46,134	53,742

Nordea Bank Danmark A/S has furthermore provided guarantees relating to registration with the Land Registry, loans disbursed ahead of building start as well as other statutory guarantees.

The majority of the mortgage loans generated by Nordea Kredit is disbursed through Nordea Bank Danmark A/S. Nordea Bank Danmark A/S has acted as intermediary for a number of securities and financial instruments transactions during the year. Salaries and pension contributions are managed by Nordea Bank Danmark A/S. Intragroup balances are settled on market terms or on a cost basis. Loans to the associated undertaking Realkreditnettet A/S amounted to DKK 1.6m at the end of 2006. In 2006 there were no exceptional related party transactions.

Nordea Kredit Realkreditaktieselskab

Statement by the Board of Directors and the Executive Management

We have today presented the annual report of Nordea Kredit Realkreditaktieselskab.

The annual report has been presented in accordance with the Danish Financial Business Act. We consider the accounting policies applied appropriate so that the annual report gives a true and fair view of the company's assets and liabilities, financial position at 31 December 2006 and of the results of the company's operations and cash flows for the financial year 2006.

We propose to the Annual General Meeting that the annual report should be adopted.

Auditors' report

The independent auditors' report

To the shareholders of Nordea Kredit Realkreditaktieselskab

We have audited the annual report of Nordea Kredit Realkreditaktieselskab for the financial year 1 January – 31 December 2006, which comprises the statement by the Board of Directors and the Executive Management on the annual report, management's review, accounting policies, income statement, balance sheet, statement of changes in equity and notes. The annual report has been prepared in accordance with the Danish Financial Business Act.

The Board of Directors' and the Executive Management's responsibility for the annual report

The Board of Directors and the Executive Management are responsible for the preparation and fair presentation of this annual report in accordance with the Danish Financial Business Act. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of an annual report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor' responsibility and basis of opinion

Our responsibility is to express an opinion on this annual report based on our audit. We conducted our audit in accordance with Danish Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the annual report is free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the annual report. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the annual report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the annual report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors and the Executive Management, as well as evaluating the overall presentation of the annual report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion. Our audit did not result in any qualification.

Opinion

In our opinion, the annual report gives a true and fair view of the Company's assets, liabilities and financial position at 31 December 2006 and of the results of the Company's operations for the financial year 1 January – 31 December 2006 in accordance with the Danish Financial Business Act.
