

LMA substitutes injunction proceedings by a patent infringement action against Ambu in the Netherlands

In continuation of stock exchange release no. 4 – 2006/2007 of 10 January 2007 LMA has filed a patent infringement action against Ambu in the Netherlands in substitution of the withdrawn injunction proceedings.

The pending legal proceedings between LMA and Ambu all pertain to whether the design of the reinforcement on Ambu's laryngeal masks – as alleged by LMA – violates the patent rights that LMA's similar product enjoys. Ambu contests that its products violate LMA's patent and challenges also the validity of LMA's patent rights.

Ambu will make a stock exchange announcement when a positive or negative development of a material nature occurs in the legal proceedings.

Ambu develops, produces and markets diagnostic and life-supporting devices to hospitals and rescue services. Ambu has five business areas: Respiratory Care, Cardiology, Neurology, Training and Immobilization. The most important business areas are Respiratory Care, Cardiology and Neurology, and the most important products in these areas are ventilation products for artificial respiration and single-use electrodes for ECG recordings and neurophysiological examinations. Ambu's products are sold worldwide. Exports account for 98% of sales, and sales are handled via Ambu's foreign subsidiaries or via distributors. Ambu has approx. 1,300 employees, of whom just under 400 work in Denmark and just over 900 abroad.
