10 January 2007

Expected result for 2006**for Rockwool International A/S**

In the third quarter report for 2006, the Rockwool Group expressed its expectation for an increase in sales for the year of 13% compared to the previous year and a result after tax and minority interests at approx. DKK 800 million.

Based on the registered level of sales in 2006, the sales increase is now adjusted upwards to 15% and a result after tax and minority interests at approx. DKK 900 million is expected.

The high demand for Rockwool products has continued in the last months of 2006, the production capacity being the restricting factor for the sales increase. However, it has by different extraordinary measures been possible to increase production more than previously expected.

There has been a continued positive sales price development. In total, the sales price increase is expected to be 4% compared with the year before.

The Annual Report for 2006 with the final annual accounts and the expectations for 2007 will be published 15 March 2007.
