IT - New version of SAXESS Trade available

A corrected version of SAXESS Trade is available for production and test. The new version of SAXESS Trade (4.50.00.023) is available for download on the member web. This is not a mandatory upgrade. We recommend you to upgrade your SAXESS Trade software if you are using "News messages"-window.

SAXESS Trade, detailed release notes:

Summary	Solution
SxT crashes when opening "News messages"-window	The crash was triggered by unknown instrument id in news messages. SxT tried to get the instrument name for an instrument id not present in SxT base data. This is corrected, SxT now ignores unknown id's in news messages.

Please contact your Technical Account Manager if you have any questions.
