IT – System testing of the new OTC Publication Service

Dates for system testing

Due to technical issues a new OTC publication service for OMX-listed and non-OMX-listed shares has not been available for testing in the external test system SEXTST1 from August 13 as informed earlier (see IT Notice 33/07). A new IT notice will be issued later with a new start date for the testing.

For further information concerning the OTC Publication Service:
