

2007 – Record year for OMX Nordic Exchange

“With five turnover records and three records for number of trades set in share trading during 2007, we have both managed to handle the peaks and the structural growth in trading. The inflow of new investment opportunities has continued from last year giving us 93 new companies and we are especially pleased with the interest outside the Nordics for listing on the Nordic Exchange. For 2008 we have already announced a number of initiatives, like fee cuts and post anonymity trading, in order to further enhance the new trading behaviours that are becoming more and more dominant on the European exchanges,” says Jukka Ruuska, President Nordic Marketplaces OMX.

- Average daily share turnover (including OTC trades) amounted to EUR 5,273 (4,197) million.
- The turnover rate was 130 (132) percent.
- The average daily derivative trading turnover amounted to 658,314 (601,514) contracts.
- The number of listed companies amounted to 855 (794).
- The number of new companies on the main market and First North amounted to 93 (103).
- The number of members amounted to 161 (159).

Highlights 2007

- The total share trading (including OTC trades) in 2007 amounted to EUR 1,318 billion, corresponding to an average daily turnover of EUR 5,273 million, thus making 2007 the best year ever in terms of trading (2006: EUR 4,197 million per day).
- The number of trades per day (including OTC trades) also reached an all time high, with 191,057 trades per day during 2007 (2006: 124,480 trades per day).
- The derivatives trading on OMX Nordic Exchange in 2007 amounted to 658,314 contracts per day, which is the best year ever (2006: 601,514 contracts per day).

Reported figures concern 2007, comparable figures pertain to 2006, unless otherwise stated.

Note that since the introduction of the Directive on Markets in Financial Instruments, MiFID, on November 1, 2007 the rules for trade reporting of off-exchange trades (OTC trades) has changed. Before the introduction of MiFID all off-exchange trades had to be reported to the exchange where the specific share is listed. This has now changed and off-exchange trading could be reported elsewhere. Furthermore, trades don't need to be reported until three business days after they have been carried out. Therefore the statistics in this report is not directly comparable with earlier reports.

For 2007, the number of trades executed automatically on the exchange amounted to 180 723 (116 612) per business day. The number of trades reported to exchange amounted to 10 334 (7 868) per business day for 2007.

More detailed statistics, including national figures, will be available later today at <http://omxgroup.com/nordicexchange/newsandstatistics/statisticsanalysis/?languageId=1>
