When defining the amount of index shares, the calculations are based on the shares on Finnish securities accounts. Ownership information for foreign index constituents is not available, therefore the free float factor for these stocks is always 100%.

The weight-limited number of shares will be determined so that in the opening index on February 1, 2008 the total weight of the share series of any single company will be no more than 10 per cent. At the closing stock prices of January 24, 2008 this would mean that Nokia Oyj's number of shares in index would be ca. 402 million, Fortum Oyj's number of shares in the index would be ca. 340 million and Sampo Plc A-shares in the index would be ca. 545 million. The closing stock prices of January 24, indicate that no other weight-restrictions are required.
