

## Exchange Notice, April 30, 2008

Series 35/08

## The new unlimited number of shares in OMXH25 index

The **unlimited\*** number of shares in the OMXH25 index, which will become effective on May 2, can be found in the attached file. The free float coefficients used in the previous quarterly review on February 1 are unchanged.

Enclosed is a sheet listing the unlimited number of shares and the free float coefficients for the constituents of the OMXH25 index.

A new exchange notice with the new number of shares used in the OMXH25 index will be sent out after the markets closing on April 30.

The weight-limited number of shares will be determined so that in the opening index on May 2, 2008 the total weight of the share series of any single company will be no more than 10 per cent. At the closing stock prices of April 29, 2008 this would mean that Nokia Oyj's number of shares in index would be ca. 451 million, Fortum Oyj's number of shares in index would be ca. 313 million, and Sampo Oyj's number of shares in index would be ca. 478 million. The closing stock prices of April 29, 2008 indicate that no other weight-restrictions are required.

\* The number of shares before free float adjustment and capping.

For further information concerning this exchange notice please contact Mårten Eriksson or William Raihle, telephone + 46 8 405 60 00.
