b = redemption amount

New exercise and futures prices have been rounded off to two decimal places and received an "X" or, if the series have been recalculated before, a "Y" in the series designation. As a result of the adjustment the number of shares per contract has increased to 106 for X-series and 112 for Y-series after rounding to the nearest full share, whereas exercise and future prices have decreased. The series have also received new ISIN-codes which are published below. The rounding off of future prices was made "trade by trade" and not on the net position.
