Finnish Stock Products 30/08

Enabling Hidden volume orders

On June 2nd, Hidden volume orders will be enabled at OMX Derivatives Markets central order book. This means that an order book order can be placed with a total volume but only showing a part of the total using the Round Robin Logic. When such an order is partially traded and the shown volume reaches zero, an additional part is shown as long as there is a total volume remaining. Hidden volume orders are enabled in both external test environments for member testing.

Hidden volume orders will be enabled for the following markets:

- Danish Index
- Danish Stock
- Euro Index
- Finnish Stock
- Finnish Stock On Request
- Icelandic Index
- Icelandic Stock
- Swedish Index
- Swedish Stock
