OMX Nordic Exchange launches OMX Stockholm 30 Free float index

On August 18, 2008, the OMX Nordic Exchange will launch a new free floated index, OMX Stockholm 30 Free Float (OMXS30FF).

Free float is defined as the portion of the share capital of a company, which is freely available for trading in the market. The objective of introducing free float criteria is to avoid a distortion in the price of a security and to improve the index' overall investability.

Index value dissemination

Index values for the OMX Stockholm 30 Free Float will be disseminated once a minute.

Weight reports

Morning and evening weight reports are available for OMX Stockholm 30 Free Float. To subscribe for the index weight reports please contact dataproduktmanagement@nasdaqomx.com

Index rules

OMX Stockholm 30 Free Float index follows "Rules and regulations of OMX Derivatives Markets, 4.8 Addendum OMXS30" and the free float adjustment calculation follows "Rules for the Construction and Maintenance of the NOREX Exchanges All Share, Sector and Benchmark Indices". The index rules are available on www.omxnordicexchange.com.

Index populations and historical time series

The OMX Stockholm 30 Free Float index has a base value of 100 and the base date is December 28, 2007. Historical time series will be available on request from August 18, 2008.

| Short Name | Long Name | ISIN | Saxess ID |
|-------------------|-----------------------------|--------------|------------------|
| OMXS30FF | OMX Stockholm 30 Free Float | SE0002581496 | 2335 |
