

IT – INET Nordic Test – Member Portal ORK Test has been redirected to INET Test NTF from INET MiFID II Test (M2) (97/17)

As previously communicated in IT-Notice [87/17](#), Nasdaq Nordic and Nasdaq Baltic have decided to redirect Member Portal Test from INET MiFID II Test (M2) to INET Test NTF for mapping of short codes to long codes, retrieve of the daily file of missing mappings (short codes used during the trading day in INET Test NTF that are unmapped in Member Portal Test). The Member Portal ORK Test environment was redirected to INET Test NTF instead of INET MiFID II Test (M2) as of December 20, 2017, and is available for short code management from today.

With the move of Member Portal Test to INET Test NTF, customers will be given the opportunity to test and verify the upcoming production application release prior to January 3, 2018, including mapping of short codes to long codes, in the INET Test NTF environment.

For more details on Order Record Keeping management and testing in Member Portal, see IT-Notice [71/17](#).

Time schedule

- Member Portal Test connected to INET Test NTF – December 20, 2017
