2018-01-02

IT – Genium INET – External Test System Information

Maintenance update External Test System 1

On January 4, External Test system 1 will be upgraded to January 3, 2018 configuration. An extended maintenance window will be used and Ext1 will be available for testing on the upgraded configuration from January 5.
All users, participants and Trader ID set up will remain. For ongoing testing it should be noted that all historical trades and positions will be removed.

Maintenance update External Test System 3

On January 9, External Test system 3 will be upgraded to January 3, 2018 configuration. An extended maintenance window will be used and Ext3 will be available for testing on the upgraded configuration from January 10.
All users, participants and Trader ID set up will remain.

External Test System 4

As previously communicated, External Test 4 will close down on January 10, and Member Portal test will be migrated to External Test 1.
