MANAGEMENT REPORT

General information

During the reporting period no changes have occurred to the composition of the Concern and it consisted from the parent company JSC „Olainfarm” and its daughter company SIA „Reinolds” which owns several patents related to the new products.

Concern is one of the biggest companies in the Baltic States with more than 35 years of experience in production of medicines and chemical and pharmaceutical products. The basic principle of Concern’s operations is to produce reliable and effective top quality products for Latvia and the rest of the world. Currently the products of Concern are being exported to more than 30 countries worldwide, including the Baltics, Russia, CIS, Scandinavian and other Western European countries, Asia and the USA.

Financial results

Sales of the Concern during the 1st quarter of 2009 increased to 5 566 223 lats (7 920 022 Euro), i.e., by 3% compared to the similar period of 2008.

Consolidated sales by quarters, thsnd. LVL

During the 1st quarter of 2009 sales to markets where marketing effort has been strengthened continued increasing. Sales to Russia grew by 49%, to Latvia by 27%, to Georgia by 97%, to Moldova by 39%, Azerbaijan by 219%. Countries like Ukraine, Belarus and Kazakhstan, where significant devaluations of local currencies have taken place during the last few months, despite the decrease of local purchasing power, the sales remained nearly unchanged.

Sales of 1st quarter 2009 by countries

In 2008 concern invested considerable amount of resources into marketing and sales promotion in several of its key markets. First returns of such investments became apparent at the end of 2008, when despite the first signs of global economic downturn and currency devaluations in several countries concern's sales growth kept the same pace, with sales of branded products, most profitable for the concern, increasing particularly fast. Such a trend remained for effective for the 1st quarter of 2009. The chart given below indicates that 4 best sold products are promoted ones. It must be noted that growth in sales of other products has been rather good too, as portfolio remains well diversified and even two best sold products combined make up no more than 30% of total sales.

Sales of 1st quarter of 2009 by products

In 1st quarter of 2009 Concern continued investing significant resources into sales promotion as these investments provide increasing returns in terms of both, sales increase and profitability increase. These returns combines with other actions taken by the Concern and targeted at cost cutting have allowed the concern to end the 6 quarters long period of loss making and produce the net profit of 466 thousand lats (663 thousand euros) during the 1st quarter of 2009.

Profit by quarters, thsnd LVL and EUR

The above mentioned improvements in sales and margins have also influenced the levels of EBIT and EBITDA. For the first quarter of 2009 EBIT was 577 145 lats (821 203 euros), while during the same period of 2008 it was negative -195 984 lats (278 860 euros). EBITDA too was performing well in the first quarter of 2009 when it nearly tripled to 1 204 787 lats (1 714 257 euros).

Stabilization of financial indicators has also facilitated the stabilization of the share price of the share price on NASDAQ OMX Riga Stock Exchange, especially during the second half of the quarter.

Price of share of Parent Company on Riga Stock Exchange (Q1, 2009)

It must be noted, however, that despite certain stabilization of the share price Olainfarm's share price was still falling sharper than the OMX Riga Index, as is shown in the chart below.

Events after the end of the reporting period

Preliminary sales figures for 4 months show that the pace of sales and profitability increase remains at the level of 1st quarter. In some countries the sales performance has improved even further. For example, sales to Belarus in 4 months have increased by 12% compared to the same period last year. Because of considerable investments into sales promotion company is very closely watching the developments of the secondary sales, i.e. the sales from wholesalers to pharmacies. Changes to secondary sales allow quite precise forecasts of sales to the particular market in the nearest months. This indicator for Kazakhstan, which is one of the countries where marketing has been significantly strengthened, has doubled in 4 months of 2009 compared to 4 months of 2008. This is yet another confirmation that the selected marketing partner is being very successful and that strong focus on marketing was fully justified.

In May 2009 the company has received 2 new Good Manufacturing Practice compliance certificates for production of 4 active ingredients, including memantine.

In May 2009 the company renewed cooperation with British subsidiary of multinational pharmaceutical company *Novartis* regarding the supplies of a chemical product. The order worth 1 million euros (700 thousand lats) for 2009 has already been received, but the longer term cooperation has also been thoroughly discussed during negotiations. This order has not been included into sales and profit forecasts for 2009, but since certain macroeconomic instability remains in several markets important for the company, it will currently refrain from adjusting its forecasts.

Financial reports are approved by the Parent Company's Management Board, on behalf of which they are signed by

Statement of Responsibility of the Management

The Management Board prepares financial statements for each financial year which give a true and fair view of the state of affairs of the Group, the cash flows and the results of the Group for that period in accordance with International Financial Reporting Standards as adopted by the EU. In preparing those financial statements, they:

- ♦ select suitable accounting policies and then apply them consistently;
- ♦ make judgments and estimates that are reasonable and prudent;
- ♦ prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Group will continue in business.

The Management Board is responsible for keeping proper accounting records, which disclose with reasonable accuracy at any time the financial position, financial performance and cash flows of the Parent Company and the Group and enable them to ensure that financial statements drawn up from them comply with International Financial Reporting Standards as adopted by the EU.

9. Basic and diluted earnings per share

Earnings per share are calculated by dividing the net result for the year after taxation attributable to shareholders by the weighted average number of shares in issue during the year. The table below presents the income and share data used in the computations of basic earnings per share:

	2009 I.quarter		2008 I.quarter	
	LVL	EUR	LVL	EUR
Net result attributable to shareholders	465 713	662 650	(355 444)	(505 751)

Earnings per share	0.033	0.047	(0.025)	(0.036)

The Parent Company has no potential dilutive ordinary shares and therefore diluted earnings per share are the same as the basic earnings per share.

21. Segment information

For management purposes group is organized into business units based on its products, and has two reportable operating segments as follows:

The finished form medicine segment represents tablets, capsules, ampoules and sachets, namely the products ready for final consumption by end users.

The chemicals segment is sales of chemicals to the clients of the Group for further processing, eventually into finished form medicines. Production of both segments is separated.

Under the segment „Chemicals” the Group has stated revenues from sale of chemical and pharmaceutical substances only to customers outside the Group. However, most of the chemicals are used to produce the final dosage forms within the Group and revenues generated by them do cover the resources invested into fixed assets used for chemical production. The Group does not keep separate books by segments.
