

Cryptzone enters the SaaS market with it's first customer

TeleComputing Norway AS and Cryptzone sign cooperation agreement.

Gothenburg 8 july, 2009 – Today, TeleComputing Norway AS and Cryptzone signed an agreement on sales cooperation. TeleComputing Norway , a company of the TeleComputing Group and one of Norway's leading SaaS vendors, software as a service, aims to introduce Cryptzone's encryption products to their customers. First priority for TeleComputing is the mail encryption product, Secured eMail.

The TeleComputing Group has 700 employees in 7 locations in 3 countries and around 800 corporate customers in the Nordic countries. Since 2000, TeleComputing ASA has been listed on the Oslo Stock Exchange.

"Cryptzone has extended its traditional sales channels from strictly selling end-user licenses to providing SaaS, to the market. This means requiring income per month on top of the ordinary sales revenue. The fact that we've now signed an agreement with one of Norway's leading players in the SaaS market is very satisfactory for the company" says Peter Davin, CEO of Cryptzone. "With this agreement, we will get a head start. We evaluate the SaaS market to be globally significant and we will start a marketing campaign directed towards the European market during the fall." Peter continues.
