

PRESS RELEASE

28 July 2009

Enea System Manager Selected by 4DK Technologies

Enhances integration and manageability of ATCA communications platform

Enea® (Nordic Exchange/Small Cap/ENEA), a global software and services company focused on solutions for communication-driven products, today announced that 4DK Technologies has selected its Enea® System Manager for the latest iteration of SCout, a telecommunications-grade service platform. 4DK will implement System Manager along with Enea® Element, a suite of high-availability, standards-based services for building robust, high-performance applications previously selected by the company as its middleware layer. The agreement was reached in the second quarter of 2009.

"At 4DK our goal is to reinvent the way communications services are created, delivered and enjoyed," said Tamara Casey, president and CEO of 4DK Technologies. "We are constantly looking to enhance our SuperConnectivity® service interoperability environment and the ATCA-based SCout platform that lies at its core. Enea System Manager streamlines the integration of our ATCA system and substantially enhances its manageability."

Enea System Manager is a first-of-its-kind, platform management solution designed to provide out-of-the-box integration for leading ATCA communications platforms. System Manager enables configuration, monitoring, control and platform software upgrade for the entire ATCA system, saving telecommunications equipment manufacturers up to 54 man-months of development time. System Manager can be implemented as a stand alone application or in conjunction with Enea Element.

"We are pleased that, once again, 4DK has selected Enea to deliver critical software for its innovative SCout service platform," Per Åkerberg, president and CEO, Enea. "System Manager is getting a great deal of attention from the communications industry and securing this key design win with an important partner like 4DK clearly demonstrates the value of our solution."

About 4DK Technologies, Inc.

Founded in 2005 and based in Herndon, VA, 4DK is a wireless technology company delivering innovative solutions to the challenges of application interoperability, integration, scalability and performance. 4DK's two products – SCout™, a telco-grade application switch for the network, and SCamp™, open source intelligent middleware for the device – enable interoperability between applications and across platforms. SCout and SCamp together deliver SuperConnectivity® – a dynamic environment where voice and data mash-ups are optimized with user location, preferences and context.
