

## PRESS RELEASE

Tyringe September 24, 2009

**New Camito order to NovaCast from Schweikert**

**The Camito order includes two Camito die shoe castings for a medium-sized trim die. The trim die will be used in the production of structural components for a leading vehicle manufacturer. This is a continuation of the business relation that was established with Schweikert at the beginning of the year.**

A decisive factor in Schweikert's choice of Camito castings was the possibility of reducing the total lead time and cost of the final die. The total value chain from one supplier, from engineering and castings to complete machined dies, offers unique flexibility. In this delivery the customer has chosen Camito dies for optimizing the manufacturing process of the complete trim die.

Schweikert is one of Europe's leading system suppliers of stamping dies and car body parts to customers like VW, Audi, Porsche and John Deere.

The die shoe castings for Schweikert will be produced at Camito Technology Center, for delivery during autumn.

**For further information contact Hans Svensson, CEO NovaCast Technologies AB, +46 705 652 250.**

*NovaCast Technologies, listed on the OMX Nordic Exchange (NCAS B), develops and markets enhanced castings for the production of car body parts, as well as software for methoding, simulating and process control for more efficient production processes to the global automotive industry and its subcontractors. With the Camito technology enhanced castings are manufactured in one solid piece for the production of dies for forming stamping automotive body components in a considerably shorter time than traditional dies. Through die manufacturer SwePart the group has expertise within the whole value chain for the production and sales of stamping dies.*
