## Nexus integrates Commtouch Messaging Security Solutions into neonInsight™ E-mail and Collaboration Suite

**Nexus Messaging Solutions and Commtouch® (NASDAQ: CTCH) today announced that Nexus is integrating Commtouch Recurrent Pattern Detection™ (RPD™) technology into its security solutions. Commtouch Anti-Spam and Zero-Hour Virus Protection will be integrated into Nexus' neonInsight Office Suite cloud services, and also will be available as an add-on to the standard neonInsight™ on-premises software offering.**

The Commtouch technology, embedded into Nexus messaging solutions, will work through a real-time connection to Commtouch's global data centers, which analyze large volumes of Internet traffic and identify new spam, virus and phishing outbreaks based on mass distribution patterns. As a result, emerging outbreaks are identified moments after they are introduced into the Internet.

“The greatest security threat to businesses today comes from e-mail borne content. We take this threat very seriously and are constantly working to minimize it,” said Jan Wallgren, managing director of Nexus Messaging Solutions. “Commtouch offers a unique approach to the spam and virus problems, detecting more than traditional methods can.”

neonInsight™ is the result of more than 25 years of experience providing Messaging and Groupware solutions to some of the largest organisations in the world. Nexus' neonInsight™ makes use of the latest tools, technologies and standards, combining open source and proprietary technologies into an integrated whole, offering the latest in standards-based access to e-mail, contacts, calendar, tasks and notes from a wide variety of clients and devices.

“Our advanced messaging security solutions are a perfect complement to Nexus' neonInsight™ product line,” said Ido Hadari, vice president of international sales and business development at Commtouch. “We continue to set the standard for advanced threat defense for mail servers, and are happy to work with Nexus to provide its clients with the most functional and secure solutions.”

### [About Nexus](#)

Nexus Technology works internationally with e-communication, information and security solutions. Our clients are companies and organisations for which IT and the Internet are essential to the management of sensitive information and knowledge. Nexus' business concept is to offer solutions,

products and services that make the right information available to the right people, at the right time, wherever they need it in the world. We help our clients to not only protect their information, e-communication and knowledge, but also to create opportunities to make more effective use of these. Nexus is an international company with headquarter in Sweden, offices in several European countries and partners all over the world. For more information please visit our web site [www.nexussafe.com](http://www.nexussafe.com).

### About Commtouch

Commtouch® (NASDAQ: CTCH) provides proven messaging and Web security technology to more than 100 security companies and service providers for integration into their solutions. Commtouch's patented Recurrent Pattern Detection™ (RPD™) and GlobalView™ technologies are founded on a unique cloud-based approach, and work together in a comprehensive feedback loop to protect effectively in all languages and formats. Commtouch technology automatically analyzes billions of Internet transactions in real-time in its global data centers to identify new threats as they are initiated, protecting email infrastructures and enabling safe, compliant browsing. The company's expertise in building efficient, massive-scale security services has resulted in mitigating Internet threats for thousands of organizations and hundreds of millions of users in 190 countries. Commtouch was founded in 1991, is headquartered in Netanya, Israel, and has a subsidiary in Sunnyvale, Calif. Stay abreast of the latest messaging and Web threat trends all quarter long at the Commtouch Café: <http://blog.commtouch.com>.
