Savene®/Totect® reaches profitability for TopoTarget

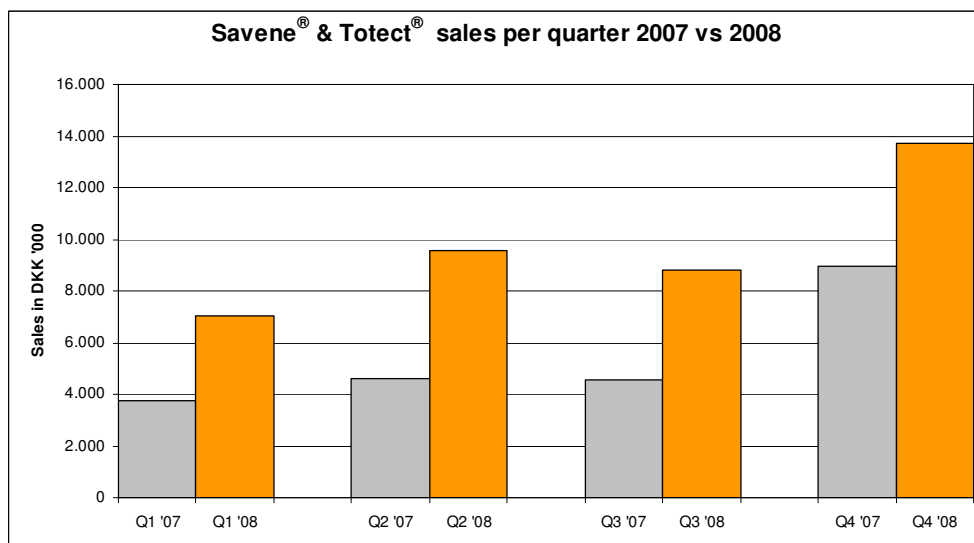

-Sales of Savene® /Totect® close to being doubled from 2007 to 2008-

Copenhagen, Denmark – 26 February 2009 – TopoTarget A/S (OMX: TOPO) has announced that sales of Savene® in Europe and Totect® in the US for the treatment of anthracyclin extravasation accidents with is now trading profitably in both continents. We have succeeded in gaining close to a doubling of sales and at the same time streamlining our activities. The total sales in 2008 amounted to DKK 39.1 mio. against DKK 21.6 mio. in 2007. Savene®/Totect® has now become a profitable and attractive business and we believe the product will be an important contributor to TopoTarget’s activities in the future.

"I'm very proud on behalf of TopoTarget that the sales of Savene®/Totect® are now in black numbers and I would like to thank our strong and dedicated sales specialist team for being a crucial factor for making a difference for patients who have been exposed to this accident with chemotherapy." Said professor Peter Buhl Jensen, CEO of TopoTarget.

Background information

About Savene®/Totect®

Savene®/Totect® is a catalytic inhibitor of Topoisomerase II, an enzyme found in the cell nucleus. Topoisomerase enzymes are essential for cell growth and proliferation and the target for a group of anti-cancer chemotherapeutics called anthracyclines. Savene®/Totect® blocks the activity of the topoisomerase enzyme and prevents the effect of anthracyclines. Savene®/Totect® is used as a detoxifying agent, administered intravenously as an antidote following an extravasation. An extravasation is a serious clinical accident in which anthracyclines accidentally leak into surrounding tissue. The high concentration of drug causes severe and cumulative damage to the skin, subcutaneous tissue, muscle and nerves. Current treatment often involves surgical removal of the tissue followed by plastic surgery and rehabilitation. The use of dexrazoxane (the active ingredient in Savene®/Totect®) to treat anthracycline extravasation is protected by patent in several countries including EU and the US. The US patent number is 6,727,253 B2.

About TopoTarget

TopoTarget (OMX: TOPO) is an international biotech company headquartered in Denmark, dedicated to finding "Answers for Cancer" and developing improved cancer therapies. The company was founded and is run by clinical cancer specialists and combines years of hands-on clinical experience with in-depth understanding of the molecular mechanisms of cancer. TopoTarget has a broad clinical pipeline but is currently focusing on the development of belinostat, which has shown proof of concept as monotherapy in treating haematological malignancies and positive results in solid tumours where it can be used in combination with full doses of chemotherapy, and is in phase II in PTCL. TopoTarget's expertise in translational research is utilizing its highly predictive in vivo and in vitro cancer models. TopoTarget is directing its efforts on key cancer targets including HDACi, NAD+, mTOR, FasLigand and topoisomerase II inhibitors. The company's first marketed product Savene®/Totect® was approved by EMEA in 2006 and the FDA in 2007 and is marketed by TopoTarget's own sales force in Europe and the US.
