Net sales for the Medical Systems business areas increased 10.2% to SEK 366.4 million (332.7) during the first half of the fiscal year. Group's order bookings, net sales and earnings

First half of the fiscal year, May – October 2009

The Group's order bookings for the period amounted to SEK 428.8 million (723.5). Demand for Sectra's products is strong, but variations in order volume for individual quarters can be significant. During the second quarter, order bookings were highly favorable, but did not reach the extremely strong comparable figures for the corresponding quarter in the preceding year, when Sectra obtained its single largest order ever. During that quarter, the Department of Health, Social Services and Public Safety in Northern Ireland chose Sectra's system for managing digital radiology images and patient information (PACS/RIS) for use throughout the country's entire public healthcare system. The order value amounted to about SEK 360 million.

Net sales for the period rose 4.9% to SEK 391.7 million (373.4). The sales increase occurred primarily because of increased sales for Sectra MicroDose Mammography and because earnings are beginning to be generated from a few large and multi-year projects which Sectra previously secured in the Medical Systems area.

Operating profit increased 87.5% to SEK 16.5 million (8.8), corresponding to an operating margin of 4.2% (2.4) for the period.

Profit after net financial items amounted to SEK 4.4 million (48.2), corresponding to a profit margin of 1.1% (12.9). Consolidated profit after net financial items for the first half of the fiscal year was negatively impacted by SEK 9.3 million in currency fluctuations, since sales in the international markets occur primarily in USD and EUR, which weakened in relation to the SEK. Comparable figures for the year-earlier period include a positive currency effect of SEK 34.2 million.

Profit after tax amounted to SEK 5.2 million (34.5). Earnings per share amounted to SEK 0.14 (0.94). Tax on profit for the period included deferred tax revenue corresponding to SEK 2.0 million for a reduction in the Swedish corporate tax rate.

International markets accounted for 68.3% (69.8) of the period's net sales.

Second quarter, August – October 2009

The Group's order bookings totaled SEK 276.7 million (548.3). Demand for Sectra's products is favorable, but variations in order bookings for individual quarters are significant. See also the above comment regarding order bookings and comparable figures for the corresponding quarter in the preceding year.

Net sales for the quarter amounted to SEK 193.9 million (199.4). Net sales during the quarter were impacted by long-term customer financing to a greater extent than during the year-earlier period.

Consolidated operating profit totaled SEK 6.4 million (7.9), corresponding to an operating margin of 3.3% (4.0). The operating margin was negatively impacted by an increase in depreciation and amortization pertaining to completed development projects. Profit after net financial items amounted to SEK 0.9 million (42.0), corresponding to a profit margin of 0.5% (21.1). Net financial items made a negative contribution to earnings of SEK 4.9 million (positive: 31.9) because of currency fluctuations. Profit after tax amounted to SEK 2.7 million (30.1). Earnings per share amounted to SEK 0.07 (0.82).

Medical Systems
The market

The global market for medical systems continues to grow. The growth is driven by replacement orders, additional sales to installed base and, to some extent, new sales to hospitals choosing to enhance the efficiency of their radiology operations by implementing digital systems for image and information management.

For some time, the US medical technology market has taken a wait-and-see approach prior to a decision on how the new healthcare reform will impact US healthcare providers.

Sectra has been expanding its distribution network and service organization for a number of years. Further expansion is currently being implemented primarily through strong local partners in selected new markets.

A total of about 50 million radiology examinations are carried out in the Company's systems annually, which makes Sectra one of the world's leading suppliers of systems for processing digital radiology images.

Changed business mix

In recent fiscal years, Sectra's medical systems operations have undergone two major shifts that impact profit margins. These comprised the expansion of the international proprietary sales and support organization and the launch of the mammography system, Sectra MicroDose Mammography, entailing an increase in production operations. The current business mix has lower profit margins than the previous one but represents a larger total potential.

Application for approval to sell Sectra MicroDose Mammography in the US

The additional study requested by the US Food and Drug Authority (FDA) to complement Sectra's application for market approval of the Sectra MicroDose Mammography system in the US is under way. The current estimate is that a positive decision should be received from the FDA during the next fiscal year.

Sales and earnings

Medical System's net sales for the first half of the fiscal year increased 10.1% to SEK 366.4 million (332.7). As in the preceding period, the increase occurred primarily because earnings are beginning to be generated by a few large and multi-year projects which Sectra previously secured in the Medical Systems area. Sales of Sectra's mammography products rose 56.6% to SEK 39.3 million (25.1) for the first half of the fiscal year.

Operating profit for the period rose 9.0% to SEK 9.7 million (8.9), corresponding to an operating margin of 2.6% (2.7). The Mammography product division posted an operating loss of SEK 40.7 million (loss: 51.9). A total of 19 units (14) were installed during the first half of the year, of which 9 units (7) during the second quarter.

For the second quarter, the business area's net sales increased 6.7% to SEK 192.1 million (180.1). Operating profit for the quarter amounted to SEK 5.2 million (8.6), corresponding to an operating margin of 2.7% (4.8).

Secure Communication Systems*The market*

The European market for secure communication systems is characterized by a demand for crypto products that support international cooperation.

Authorities and defense agencies cooperate increasingly across borders, and common norms and standards have developed to protect the security of EU-classified information. Sectra is first in the market to supply EU-approved products for secure mobile voice communications. The products are used by customers in more than half of the EU's 27 member countries. In 2008, Sectra's Tiger XS was also certified by NATO and with its dual security approval, it holds a unique position in the European market.

Sales and earnings

Secure Communication Systems reported continued stable net sales, operating profit and operating margin. Net sales for the first half of the fiscal year rose 3.3% to SEK 43.5 million (42.1). Operating profit increased 4.6% to SEK 6.8 million (6.5), corresponding to an operating margin of 15.6% (15.4).

For the second quarter, the business area's net sales rose 26.4% to SEK 26.3 million (20.8). Operating profit increased 35.7% to SEK 3.8 million (2.8), corresponding to an operating margin of 14.4% (13.5).

Depreciation/amortization during the first half of the fiscal year amounted to SEK 22.8 million (17.2), of which SEK 12.5 million (8.8) pertained to the second quarter.
