ReadSoft to deliver SAP-certified invoice automation technology worth \$360,000 USD to American industrial group

ReadSoft is to implement its SAP-certified invoice processing solution at one of the world's largest producers of recycled lead. ReadSoft is selected because of its core focus on invoice automation and its tight integration with SAP. The agreement, valued at \$360,000 USD, will process tens of thousands of paper and electronic invoices.

The U.S. based organization is one of the largest producers of recycled lead in the world. After a recent SAP implementation, the company realized certain shortcomings in its accounts payable (AP) processes. Even with the operational efficiency gains associated with implementing SAP, there were many manual, time-consuming processes and some paper-based steps. The company recognized the need for an invoice automation solution in order to fulfill its desire to achieve the best-in-class AP operations. The objective is to eliminate the labor-intensive steps by optimizing its AP efficiency while leveraging the investments already made in SAP.

ReadSoft was selected, because the company recognized ReadSoft as the only vendor with a primary focus on invoice automation and a tight integration to SAP. Moreover, ReadSoft provides direct support for the chosen solution.

“We are very glad that ReadSoft, once again, is the trusted provider of invoice automation solutions within the SAP space,” comments Jan Andersson, CEO at ReadSoft. “We look forward to work with this company in realizing their goals – to achieve best-in-class AP practices.”
