

Exchange Notice

Derivatives – Product Information 54/18

Equity Derivatives Products and Market Model Related Changes Postponed

Concerning Flexible Derivatives and Danish Tick Size Tables & Exercise Price Intervals

As announced on 19 April 2018 (click [here](#) for relevant IT Notice), the upgrade of the Genium INET platform to version 5.0.0205 is postponed. This notice is to inform market participants that accordingly the products and market model related changes planned to be introduced in connection to the upgrade, will not take effect on 23 April 2018. The affected changes include:

- The introduction of **on-exchange trading of flexible equity & index derivatives**, as previously announced in [Product Information Notice \(36/18\)](#)
- Changes to **tick size tables for Danish Derivatives** and **exercise price intervals for OMXC25 Index Options**, as previously announced in [Product Information Notice \(38/18\)](#) and [Product Information Notice \(39/18\)](#), respectively.

As a result of the postponed system upgrade similarly the **Genium INET Market Model** document version 2.3 for Equity Derivatives will not take effect on 23 April 2018.

For further information on this exchange notice please contact product managers Joakim Fernlund or Tomas Körberg, telephone +46 8 405 60 00.
