MANAGEMENT REPORT

BUSINESS AND MISSION

Italeaf is an Italian investment company and company builder that aims to transform technological start-ups into global companies. Italeaf identifies industrial initiatives within the cleantech sector and within the sphere of innovative industrial production, where the Company can leverage its strong expertise and track record.

In supporting new start-ups, Italeaf aims to replicate the success of TerniEnergia, a company established in 2005 and listed on the Italian Stock Exchange in 2008. Since the IPO after its start-up, TerniEnergia has become a leading global company in the field of renewable energy, waste management, and energy efficiency, with a market cap of over Euro 80 million.

With the creation of subsidiaries in London and Hong Kong, Italeaf intends to give an international flavor to its business, broadening the spectrum of the activity of scouting and looking for innovative companies.

The company has invested in three new industrial initiatives: GreenLed Industry, operating in innovative industrial lighting production; Skyrobotic, active in the production of commercial and civil drones; and WiSave, a producer of smart devices for the remote control of energy consumption.

Italeaf strives to develop an ideal environment to foster creation and growth of new companies, through three lines of business:

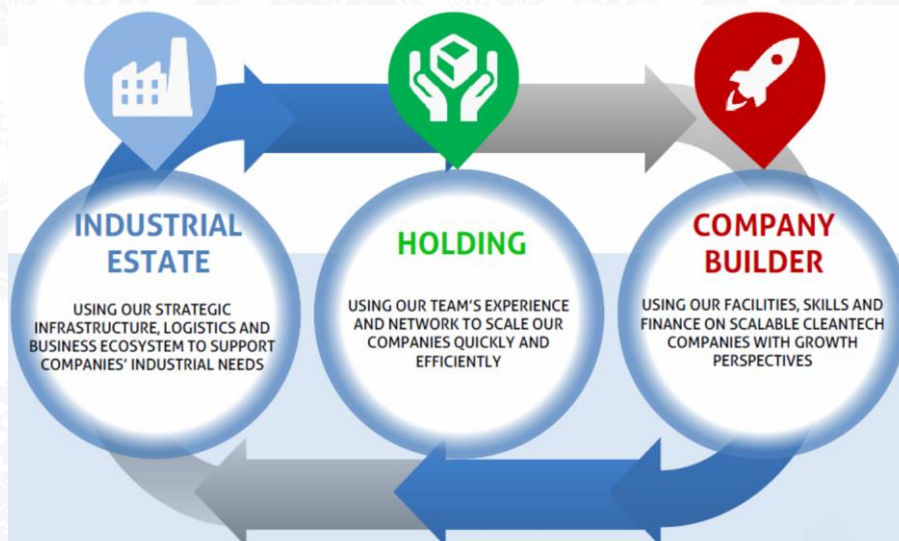

1. **Company Builder:** we co-found start-ups with direct investments, a proven business model and a strong focus on execution. Italeaf concentrates its activities on clearly defined market segments, such as the cleantech sector. We provide innovative incubation services with seed investments to create a breeding ground for a highly skilled company network.

2. **Holding:** we manage our investment portfolio and we provide centralized service activities to our Group companies (finance, treasury, IT, legal, corporate communication and logistics for administrative, managerial and commercial support) to facilitate value creation and growth for the portfolio companies.

3. **Real Estate:** we use our strategic infrastructure, logistics and business eco-system to support the companies' industrial needs. In particular, we are creating (with the consultative input of the Politecnico di Milano University) an eco industrial park in our facilities in the center of Italy. We own and manage an industrial area with a total area of about 24 hectares and co-working space of 1,800 square meters.

Each of these activities is functional to the others; our approach is something completely new compared to traditional incubators and other venture capital firms. The track record gained over the years (with the listing of TerniEnergia and TerniGreen on the Italian Stock Exchange and the constant value creation for shareholders) is proof of our passion and expertise.

The Company capitalization and its majority stake in TerniEnergia, listed on the Borsa Italiana's STAR segment (which entails rigorous requirements), are factors to mitigate the risk that is normally associated with start-up businesses. Value creation through industrial innovation is what we have achieved in recent years. Now, we intend to offer our vision to the market with a strong international expansion project. The listing of Italeaf on NASDAQ OMX First North is therefore an important starting point for innovatively responding to the new challenges of global change.

On February 9 2015, The Board of Directors of TerniEnergia, smart energy company active in the fields of renewable energy, energy efficiency, waste and energy management, listed on the Star segment of the Italian Stock Exchange and part of Italeaf Group, approved the industrial plan 2015-2017, with updating of the 2014 forecast. TerniEnergia aims to become the first Italian independent "smart energy company", active in the fields of renewable energy, energy efficiency, waste and energy management, thanks to the new business model and the integration into the Group of Free Energia.

Confirmed the evolution of the organizational structure, which will be based on four functional business lines: Technical Services, Cleantech, Energy Management and Energy saving, with the completion of the merger of Lucos Alternative Energies in TerniEnergia.

TerniEnergia expects to 2017 a substantial increase in revenues and profitability and, simultaneously, a containment of the NFP and a growth of cash flow.

The plan estimates an increase in value of production (2014-17 CAGR) of 47%, more than Euro 1.2 billion in three years, with interim targets of Euro 355 million in 2015, Euro 437 million in 2016, Euro 475 million in 2017, with an increase of revenues from energy saving and cleantech business lines.

EBITDA for the plan period is expected to grow by 14%, estimated at Euro 23 million in 2015, Euro 28 million in 2016 and Euro 32 million in 2017. In 2017 it is expected a balanced contribution of the four business lines (technical services, cleantech, energy management and energy efficiency) to the formation of Ebitda. The margin will remain constant over the plan period, more than 6%, demonstrating the robustness and repeatability of the new business model and a lower risk approach through diversification and integration of the energy value chain.

EBIT is expected to grow from Euro 16 million in 2015 to Euro 22 million in 2016, to Euro 25 million in 2017. At September 30, 2015, there were no indicators to suggest impairment of goodwill.

The goodwill booked during the year, amounting to Euro 9,055,000, relates to the acquisition of control in Free Energy S.p.A., a company active energy management, energy sales to large electricity customers, and implementation of software and services computing for energy. Since the asset has an indefinite useful life, it is not subject to amortization, but it is tested at least annually for impairment. <i>(in Euro)</i>	September 30, 2015	December 31, 2014	Change	Change %

Total	116,495,955	118,229,005	(1,733,050)	(1.5)%

Land and buildings mainly refer to the value of the industrial site in Nera Montoro (with an area of 24 hectares) and incubator in Maratta, both owned by Italeaf S.p.A..

Investments in land and buildings also include the value of properties owned by the TerniEnergia Group, which consist of two industrial buildings at the Nera Montoro plant, as well as the value of land for the construction of a composting plant in the Province of Lecce.

Plant and machinery as at September 30, 2015 includes the value of photovoltaic plants with a total capacity of 16.6 MW, as well as the value of the end-of-life tyres plants, a biodigester plant and water treatment plants, all of which are located at the Nera Montoro industrial site. All of these plants are owned by the TerniEnergia Group, with the exception of one photovoltaic plant (0.8 Mwp) owned by Italeaf S.p.A. installed on the roofs of some buildings in Nera Montoro site.

Assets under construction in the amount of Euro 20,671,238 refer almost entirely to the subsidiary, TerniEnergia. Such investments cover:

- The installation of an aerobic biodigester and composting plant at Calimera (Lecce);
- A combined cycle electric power plant using pyro gasification of virgin wood chips, in Borgosesia (Vercelli); the plant was connected to the electricity grid in December 2012, and got a feed-in tariff of Euro 0.28 /kWh;
- A second end-of-life tyres plant.

Finally, assets under construction include capitalized costs sustained by TerniEnergia in prior years for the development of an 18MWp wind farm in Stroncone. Total	90,236,807	79,197,823	11,038,984	13.9%

Trade receivables amounted to Euro 90,236,807 as at September 30, 2015, with most of the balance due from customers. The Euro 24,199,675 receivables for invoices to be issued mainly refer to energy management activity of Free Energia.

Among the receivables included there is a credit recorded in the accounts of the subsidiary TerniEnergia, amounted approximately to 2.9 million euros, which is the remaining part of the consideration, originally amounted to 40 million euro, finalized through the sale in 2011 of two photovoltaic plants of total capacity of about 12 megawatts, currently in full operation. Although in December 2012 an agreement for the payment of the requested amount has been reached, the other party did not honor its obligations. Despite repeated attempts to close the issue as extra-judicial, the company was forced to start in August 2013 a legal action in order to recover the amount claimed. In particular TerniEnergia, with the assistance of its lawyers, considers as specious reasons to refuse the payment by the counterparty, under the light of the factual and legal elements, serious and concrete one, and therefore, until the date of the balance sheet, it is reasonable reason for believing not configurable a probable liability to be borne by the company.

The amount of trade receivables is adjusted by a provision for doubtful debts of Euro 726 thousand to cover the risk of default of certain receivables arising in previous years.

The reserve mainly reflects the negative fair value, offset by related tax effects, of derivatives booked by joint ventures and subsidiaries to hedge exposure to variability in cash flows, related to the fluctuation of interest rates on certain medium-/long-term loans. The derivative contracts meet the criteria set out by IFRS to classify for hedge accounting, and therefore the changes in the fair value of the derivatives are booked to a specific equity reserve (cash-flow hedge reserve) with regard to the effective portions of the derivatives.

The equity of minority interests refers mainly to the capital and reserves accruing to the minority shareholders of the Group, the TerniEnergia Group, Greenled Industry S.p.A. and Skyrobotic S.p.A.

COMMITMENTS AND GUARANTEES GIVEN

GUARANTEES

In some cases, customers of the TerniEnergia have funded the purchase of the photovoltaic system through lease agreements with leasing companies. For some of these customers, the Parent company has signed with the leasing company for a takeover agreement to the customer in the lease in the event of, and subordinate to, the failure by its customers. Customers are also involved in this case, to transfer to TerniEnergia the lease agreement and any debt outstanding at the date of transfer, if generated by power plant under contract.

TerniEnergia administrators believe that the probability of occurrence of transfer is extremely remote, since, in practice and with the exception of the initial maxi tranche of leasing contract. Whereas the existence of a maxi initial paid by the customer to the leasing company, the values in effect at time of a takeover, based on current development plans for the cash flows of photovoltaic systems affected, would see a future excess flows generated by energy production compared to outflows for royalties due.

On September 30, 2015, the residual customers' payables to leasing companies for which the above mentioned agreements were taken over total Euro 61.2 million, of which Euro 32.4 million for companies managed or owned by related parties (2.4 million for 100% controlled companies), Euro 17.6 million for joint ventures, Euro 1.9 for the parent company Italeaf, and Euro 10.5 million for other related parties ; the rest of the balance, equal to Euro 28.7 million relates to other third-party customers.

CONTINGENT LIABILITIES

DISPUTES, INVESTIGATIONS AND JUDICIAL PROCEEDINGS IN PROGRESS

On September 30, 2015, there were no legal or fiscal proceedings or disputes pending against Italeaf or other companies of the Group, except as outlined below.

DISPUTE WITH MILIS ENERGY SPA

The dispute covers Milis Energy's eviction of TerniEnergia, with regard to a photovoltaic plant on greenhouses in Sardinia in the Municipality of Milis. Milis Energy has asserted TerniEnergia S.p.A.'s default with respect to the construction of the plant and for this reason, it suspended the payment of approximately Euro 7 million, claiming the need to substitute bolts (allegedly deteriorated) in the amount of approximately Euro 50,000.

In virtue thereof, Milis Energy proceeded to evict TerniEnergia from the work site, with an act of eviction dated 17 July 2013.

TerniEnergia appealed to the Court of Oristano, obtaining an ordinance dated 4 February 2014, that declared the eviction was illegal, and that ordered Milis Energy to immediately allow TerniEnergia to take possession again of the works covered by the contract. Milis Energy filed an appeal against the ordinance, and such counter appeal was upheld by the Court of Oristano.

In relation to its credit claimed from the customer, TerniEnergia filed and obtained an injunction against Milis Energy S.p.A. for the amount due by Milis for the contract referenced above.

The Court of Milan sustained the appeal and issued the injunction that was served as required by law.

The counterparty appealed, and the first hearing was held on 27 May 2014, and at such time, the judge unsuccessfully attempted to get the parties to come to agreement. With the order of 17 September 2014, the Court of Milan ruled on the request for provisional execution advanced by TerniEnergia, upholding the request for an amount of Euro 5,089,991.93, excluding interest, granting the provisional execution of the injunction to pay. The aforementioned sum was paid by the counterparty at the beginning of October 2014.

In addition, at the end of July 2014, a summons was filed with the Court of Milan, for the recovery of other amounts claimed from Milis Energy, that were not covered by the previous injunction. The summons covered a receivable related to a bonus (Euro 1,050,000) and a receivable related to the supply and installation of panels (Euro 1,038,000). In view of the foregoing and on the basis of the opinions of its legal counsel, the Company believes there are significant possibilities to recover all of the amounts claimed from Milis Energy.

DISPUTE WITH MADA S.R.L.

The dispute refers to the non-payment of a 997kWp photovoltaic power plant by the company, Mada S.r.l.

As a result, after repeated requests for payment, TerniEnergia:

- proceeded to remove the photovoltaic panels and other removable materials from the work site (in conformity with the provisions in previous written agreements between the parties);
- filed for a summons with the Court of Terni, aimed at having the court ascertain the customer's material default, the contractual obligations assumed, and therefore, the termination of the contract pursuant to Article 1453 of the Civil Code, with the consequent sentencing of the customer to pay all damages suffered, quantified as Euro 1,046,890 (the loss of earnings equal to 30% of the contract price, whose total amount was Euro 3,489,640) or any greater or lesser sum as ascertained during the proceedings. The lawsuit was filed under R.G. 2005/11. As part of the proceedings, TerniEnergia was served an act to appoint an arbitrator and to apply for arbitration on 7 December 2011. TerniEnergia formally opposed the arbitration proceedings with an act served on 27 December 2011, when it also identified its own arbitrator if, in the unlikely event, the ordinary court were to be deemed not to have jurisdiction over the matter. As of the date of the preparation of these financial statements, an arbitration award had been made that rejected the Mada's request for compensation. With regard to the proceedings at the Court of Terni, the judge deferred any further action until 14 April 2014, so that he could procure the act of the arbitration award, including for the purpose of avoiding conflict between the parties involved in the judgment. The counterparty has contested the arbitration award at the Court of Appeals of Perugia. Considering the reasoning underlying the arbitration award and the reasoning for contesting it, the Company believes that there are no possibilities that the counterparty's appeal will be sustained by the Court of Appeals.

Accordingly, considering the risk inherent to any type of dispute and the assessment already presented by the legal counsel retained especially for the case, the parent company believes there are reasonable motives for an outcome in its favor in the aforementioned civil proceedings. On the basis of the facts set out above that were incorporated into the lawsuit promoted by the company, and considering the possibility of a settlement with the customer with the consequent conclusion of the work, a decision was made not to write down any of the residual costs (around Euro 0.4 million) not representative of removable material (panels, inverters, etc.) which are included products in process as at September 30, 2015.

DISPUTE WITH REGNI

The company is involved in two disputes with the heirs of Regni, which arose as a result of the failure by the heirs of Regni to grant a right of easement necessary for the passage of the cable duct of a photovoltaic system owned by the Group. The first dispute is pending with the Council of State, in the second degree of justice and concerns the opposition to the order issued by the Municipality of Perugia for the demolition and the restoration of part of the cable duct realized in absence of the act authorizing the land easement on which the cable duct has been placed. The second dispute was promoted by the company against the heirs of Regni at the Court of Perugia in order to obtain the concession of the electric power line easement, by virtue of the commitments contractually undertaken by the heirs of Regni, at the time when they assigned to TerniEnergia the photovoltaic plant project and the surface right related to the land on which the plant was to be realized.

With reference to the first dispute, the suspension of the effectiveness of the regional administrative court's sentence has been granted; the sentence authorized the demolition and the restoration; and the parties are now awaiting the scheduling of a hearing on the merits of the case. With reference to the second dispute, a deferral for negotiations has been ordered. In relation to the two cases, the heirs of Regni have submitted proposals for settlement. The negotiations are still in process. In the meantime, the judge has admitted the request for technical consultancy so as to ascertain that the original project, prepared by Mr. Regni, was deficient and flawed. At present, the technical consultancy ordered by the judge is in process with respect to the state of the locations and the project.

The company, including with the support of its legal counsel, believes it is reasonable to argue that there is currently no probable liability, nor are there any elements to suggest a loss of value on the equity investment in the company that owns the photovoltaic plant in question.

FREE ENERGIA TAX LITIGATION

In 2014, the company, Free Energia, was subject to a tax audit to verify the company's position with respect to value-added and direct taxes, in particular with reference to the physical trading of electric energy undertaken with certain counterparties, acting as suppliers or customers. Upon the conclusion of the audit for the year of 2009, on October 27, 2014, the tax police issued a report of findings in which it contested the existence of the trading with the

aforementioned contractual counterparties. On December 23, 2014, the company presented its observations to the report of findings, so as to evidence the lack of foundation of the assertions made by the auditors.

On January 12, 2015, the Italian revenue authority served a notice of assessment (TK30351049963/2014) with which it assessed incremental value-added taxes in the amount of Euro 6,678,836 and a single fine of Euro 8,348,545 for violations under Article 6, Paragraph 6, Legislative Decree no. 471 of December 18, 1997 (illegal deduction of value-added taxes) and Article 5, Paragraph 4, Legislative Decree no. 471 of December 18, 1997 (tax return with tax less than that due). At the same date, the Italian revenue authority served a notice of dispute (TK3CO5103221 2014) in which it disputed the accounting of costs related to invoices for objectively non-existent transactions, and applied the penalty of Euro 15,617,027.02 (Article 8, Paragraph 2, Legislative Decree no. 16 of 2 March 2012). The notice of assessment and the notice of dispute served to Free Energia are based on the same findings already included in the report of findings, without introducing any new reasons or elements of proof to support the tax authority's claims. On January 27, 2015, with reference to the notice of assessment, the Company filed a tax settlement proposal, and is currently in contact with the tax authority in order to schedule a discussion of the matter as soon as possible, and to assert the non-existence of the tax authority's claims. Instead, with reference to the notice of dispute, the Company is preparing its defense, as provided by Article 16, Paragraph 4, Legislative Decree no. 472 of December 1997.

In addition, on March 11, 2015, the tax police issued another report of findings about the Company, with reference to the tax years of 2010 to 2013. This report contained essentially the same claims as that for the year of 2009, with an expansion of the number of counterparties.

The company, including on the basis of authoritative opinions of consultants, believes there is no foundation to the elements introduced by the Italian tax authority in the notices for assessment and dispute with reference to 2009 and in the report of findings for the years of 2010 to 2013, according to which the transactions for physical trading of electric energy were non-existent. The tax authority's objections do not consider the widespread commercial practice in trading which provides for physical netting of sale and purchase positions between the parties in order to keep the operating costs low and, consequently, to maximize the reduced profit margins that such trading generates.

Therefore, the company, based on the foregoing and supported by opinions issued by its consultants, currently believes that the risk linked to the aforementioned situation is to be considered potential, and accordingly it has not made any risk provision to the financial statements as of September 30, 2015.

TAX DISPUTES AGAINST TERNIENERGIA - NOTICE OF ASSESSMENT "COSTS BLACKLIST"

TerniEnergia, on July 20, 2013 received a formal notice of assessment by the verifiers Fiscal Control Office in which it was acknowledged the presence of commercial relations in 2010 from TerniEnergia with companies located in countries with preferential taxation for the purchase of photovoltaic panels. Subsequently, on March 28, 2014, the Agenzia delle Entrate (Italian tax authority) served TerniEnergia a notice calling upon the Company to provide appropriate documentation to demonstrate either the two of exemption provided for in Article 110. The company produced the Office required documentation. On 13 February 2015, the Agenzia delle Entrate has drawn up for debate with formalizing of the tests carried out on the documentation submitted by the company and felt very unsuitable to the showing of the exemption. The Company, subsequently, on 10 April 2015, has produced further documentation in the meantime found for the deduction of the costs in question. On June 3, 2015, the Tax Authority, deeming it unfit the copious documentation provided by the Company notified a notice of assessment with which ascertained a higher tax for Euro 1,886 thousand for alleged improper deduction of costs related to suppliers based in countries called. "Blacklist", and a penalty of € 1,886 thousand plus interest of law.

TerniEnergia Parent Company believes totally unfounded the evidence produced by the Inland Revenue in the assessment above in consideration of valid arguments and copious documentation at its disposal to bring in tax litigation.

TerniEnergia therefore, based on the foregoing and supported by opinions issued by its consultants, currently believes that the risk linked to the aforementioned situation is to be considered potential, and accordingly it has not made any risk provision to the financial statements as of September 30, 2015.

SUBSEQUENT EVENTS

THE BOARD OF DIRECTORS APPROVES THE DIVESTMENT AGREEMENT FOR THE TRANSFER OF THE SHARES OF FREE ENERGIA SPA

On October 2, 2015, the board of directors of Italeaf has approved today to sign the divestment agreement for the transfer to the former leading shareholders of Free Energia SpA of n. 3,674,604 shares equal to 97.60% of its share capital, and representative of the entire stake held by TerniEnergia in Free Energia.

Afterwards, the Board of Directors of TerniEnergia, smart energy company active in the fields of renewable energy, energy efficiency, waste and energy management, listed on the Star segment of the Italian Stock Exchange and part of Italeaf Group, resolved today to sign the divestment agreement for the transfer to the former leading shareholders of Free Energia SpA of n. 3,674,604 shares equal to 97.60% of its share capital, and representative of the entire stake held by TerniEnergia in Free Energia, the details of which have been already communicated to the market through the Press release disseminated last 7 August 2015.

The counter-value for the transfer of the entire equity shares in Free Energia S.p.A. (unless a lesser number of shares in the event that not all former members of Free Energia would decide to join the Agreement Divestment) is represented by the TerniEnergia's shares subscribed by the leading former shareholders of Free energia in the dedicated capital increase on Oct. 21, 2014.

Specifically, the leading former shareholders of Free Energia SpA which will take over the shares of Free Energia S.p.A. are the following:

- Energetica S.p.A.;
- BA & Partners S.p.A.
- Sistematica S.p.A..

The counter value for the transfer of the entire stakeholding in Free Energia (unless a lesser number of shares in the event that not all former shareholders of Free Energia would decide to join the Divestment Agreement) is represented by the shares subscribed by the main TerniEnergia former shareholders of Free Energia in the dedicated capital increase on Oct. 21, 2014. The counter-value of the payment due was confirmed by a report issued on September 30, 2015 by the statutory auditor Dr. Luigi Tardella of Ambers & Co S.r.l., independent expert identified by the parties, who certified that the value of the entire investment in Free Energia is included in a range between Euro 15 million and Euro 20 million and that this value can be considered equivalent to the value of the TerniEnergia's shares unlisted. Consequently there is no need for any cash payment.

In this context, the Board of Directors has approved to proceed with the transfer expected in the Divestment Contract at a value that is placed in the middle position of the aforementioned range as indicated by the expert and then to a value considered adequate equal to Euro 17.5 million.

The transaction is subject to two specific conditions precedent, which must occur by 30 November 2015, and in particular to the positive pronouncement by (i) the general bondholders' meeting convened for the November, 9 2015 and (ii) of the ordinary shareholders' meeting of TerniEnergia, convened for the November, 18 2015. The closing of the transaction is expected by the tenth business day following the occurrence of the last of the conditions precedent above.

The TerniEnergia's shares received following the completion of the transaction will be subsequently canceled, unless the Board of Directors do not resolve to put them, in whole or in part, at the service of any operations regarding the involvement of third-party investors, who have not yet identified .

As an outcome of the analyses performed by TerniEnergia, the operation cannot be configured as a "related party transaction".

With reference to the conditions stated above, TerniEnergia take care to promptly inform the market about any further action or relevant fact regarding the aforementioned transaction.

THE SHAREHOLDERS MEETING OF GREENLED INDUSTRY S.P.A. PREPARES THE EXIT OF THE STARTUP WITH AN EXTRAORDINARY TRANSACTION

On October 6, 2015, the Shareholders' Meeting of Greenled Industry S.p.A. approved the partial and non -proportional demerger of the Company Greenled Industry in favour of a new beneficiary Company named ITALEAF RE S.r.l.

The operation aims to make a more streamlined Greenled Company free from not used assets which were supposed to be used for the performance of its activity, also in view of a possible value realization of the Company (in line with the provisions of the business plan of the mother Company Italeaf).

In fact, the presence of sheet assets unrelated to the "core", business currently held in the industrial site of Novara which has become the main logistic and manufacturing center of the company, could complicate the evaluation process of Greenled aimed at a possible sale transaction. Furthermore, with this operation will be possible to include the real estate portfolio, objet of the transaction, in full availability of the major shareholder, Italeaf, which, through the setting up of a specifically real estate company, will use it to better serve the new initiatives, in line with its business model. The real estate portfolio object of the demerger has a value of Euro 2.6 million. The transaction was subject to a congruity opinion issued by the statutory auditor Mr. Luigi Tardella from Ambers & Co Ltd, an

independent expert. To Italeaf S.p.A. will be allocated 100% of the shares of the beneficiary company being formed ITALEAF RE Srl. Following the transaction, the shareholding of Italeaf in Greenled Industry will drop from 79.71% to 64.60%.
