Corbion Hires Theresa Cogswell

Leader brings decades of successful experience to role as Innovation Program Director, Bakery

Staying fresh is important in the bakery industry – and that's one reason why Corbion, with more than 100 years of dedicated service to bakers, continues to focus on research and development, working with customers to push the boundaries of innovation.

To further the effort, Theresa Cogswell has been hired as Innovation Program Director, Bakery. In her new role, she will lead the RDA Bakery team in developing new products and services and will support the Corbion sales team.

A flour miller by education and a baker by profession, Cogswell builds on more than 35 years of industry experience. In 2007, she left Interstate Brands Corporation (Hostess Brands at the time), and started her own consulting business, BakerCogs, Inc.

"We are excited about Theresa's entrepreneurial take on innovation, and her enthusiastic approach to collaboration between RDA, sales, marketing and customers," says Anieke Wierenga, Senior Director, Innovation, Food. "Her addition to our global team further strengthens our food RDA community with industry colleagues, customers and academia."

Cogswell is a graduate of the Milling Science and Management program at Kansas State University. She will be located at Corbion's North American headquarters in Lenexa, Kansas.
