## Mid-Norway faring well - moderate exposure to consequences of lower shelf activity

- Credit quality of the bank's loan portfolio is satisfactory, and loss and default levels are low
- The bank anticipates declining GDP growth rate due to reduced oil investments. A weaker Norwegian krone is positive for Norwegian exports, and will partially offset some of these effects
- There are wide variations in industry structure in the region:
  - In North-Trøndelag much activity centres on primary industries and retail/wholesale trade
  - Industry composition in South-Trøndelag is more service-driven and relatively similar to the wider Norwegian mainland (non-oil) economy
  - Møre and Romsdal have a substantial supplier industry, but much activity is also export-oriented
- Stable low unemployment (Norwegian Labour and Welfare Administration (NAV))
  - 2.5 % in South- and North-Trøndelag
  - 2.3 % in Møre and Romsdal
  - 2.7 % for the entire country in May 2015.

*(NAV figures: Figures for registered unemployment at local and county level are published by NAV)*

## BN Bank to be dedicated to the retail segment

- The board of directors of BN Bank has resolved to cultivate the bank as a retail bank and to wind down the corporate business which consists of lending to commercial property.
- The background to this decision is a desire to further develop the retail banking business by cultivating BN Bank as an offensive bank for customers who prefer a self-service concept and favourable borrowing rates over time.
- BN Bank's corporate banking business has focused on funding well secured commercial property exposures, and the corporate market has traditionally been an important area for BN Bank. However, capital adequacy rules specific to Norway cause return on equity on this low risk segment to be relatively low. There is no prospect of changes to this specifically Norwegian capital adequacy regime. As a result profitability will remain too low since the prices are set by actors operating under different framework conditions.
- The bank has in recent years built up a substantial retail banking operation with satisfactory profitability. The board of directors of BN Bank sees a major development potential in this area, and will channel all effort and energy to the retail business. The bank aspires to increased growth and a further increase in profitability.
- BN Bank will remain a part of the SpareBank 1 Alliance. SpareBank 1 SMN will maintain its owner stake in BN Bank and will play its part in ensuring that the business change is carried through in a manner that secures creditors' interests.
- 
- The process of winding down the corporate banking business will be carried out in a controlled manner over time. For SpareBank 1 SMN this will in isolation reduce consolidated risk weighted assets, thereby improving capital adequacy.

## Excellent result and strengthened financial position in 1st half of 2015

Strong profit performance, 13.7% return on equity in first half of 2015

Core business remains on positive trend. Strengthens a very solid market position in Trøndelag and in Møre and Romsdal

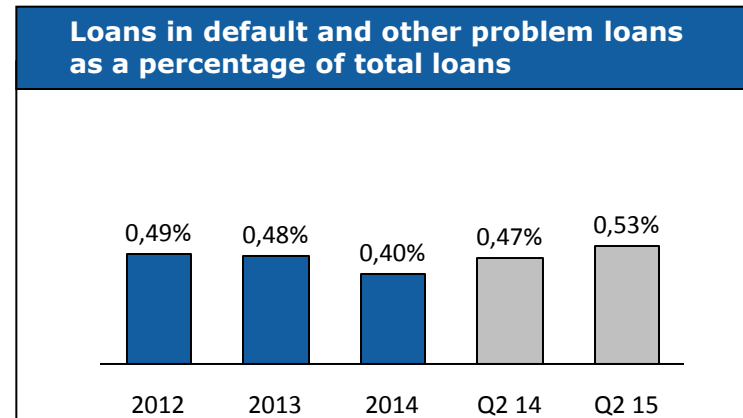

CET1 capital ratio at 12.7 %. Target of 13.5 % by 30 Juni 2016 will be met by profit retention and moderate growth. New CET1 target of 14.0% by 31 December 2016

Restructuring of BN Bank into a purely retail segment bank frees up capital and strengthens profitability. CET1 capital ratio at SMN to be improved by 1.3 pp when restructuring completed

Self-service simplifies and improves both customer experience and production processes. Costs to be kept to 2014 level at the parent bank

SpareBank 1 Markets consolidated as a subsidiary. Samspar banks increased their stake in SpareBank 1 Finans Midt-Norge to 27.1% as from Q2

- Incomes derive from a wide range of products both from the parent bank, the subsidiaries, and the SpareBank 1 Group

# SpareBank 1 SMN will achieve zero growth in costs by means of defined measures

1

## **New distribution model:**

Increased self-service and digitalisation, continued strong presence in market area

2

## **Organizational adjustment:**

Staff reduction in the period to 2017

3

## **Cost reduction programme:**

Targeted measures at the parent bank will enable the target of zero growth in nominal kroner in the period to 2017 to be met

## FTEs crucial to achieving costs goal

- At end-June there were 48 fewer FTEs at the parent bank than at year-end
- This is mainly natural wastage
- A further reduction of about 75 FTEs is aimed for by the end of 2016

*In this set-up 32 FTEs in the capital markets activity at SMN in 2012, 2013 and 2014 are excluded. This activity including 32 FTEs were transferred to SpareBank 1 Markets as from Q2 2015.*

## Costs, parent bank and subsidiaries

### Comments

- Of the increase at group level, NOK 46m relates to the consolidation of SpareBank 1 Markets as a subsidiary as from Q2 2015
- The effect of the transfer of markets activities to SB1 Markets in Q2 yielded a cost reduction of NOK 10m. This taken into account, net cost growth at the parent bank is NOK 5m, corresponding to 0.8%
- The goal is zero growth in parent bank costs in 2015 and 2016

## Cost growth in parent bank 0.8 %, SB1 Markets transaction taken into account

### Modest cost growth

- Fewer FTEs reduces personnel costs
- Further reduction in FTEs in second half-year
- Parent bank costs to be kept to the same level in 2015 as in 2014

## SpareBank 1 SMN will come across as cost-efficient not just on an individual basis but also as a group

### Profitable and non-capital-intensive subsidiaries:

- ① Both EM1 and Regnskapshuset SMN are companies making a sound profit – and requiring little equity capital compared with the group's other businesses
- ②
- ③ In their respective segments they are highly cost-efficient

But pose a challenge to the group's cost / income ratio

### Comments

- Subsidiary of SpareBank 1 SMN from Q2 2015
- A more robust business model established after integration with SMN Markets and costs measures in 2014
- Good underlying development

# High share mortgages and diversified portfolio SMEs

- Large portions of the retail market and primary industries are risk-dampening. The Group has a well diversified corporate market portfolio
- The growth is relatively diversified

# Oil related portfolio: Possible effects for SMNs exposure related to reduced activity in the oil and gas industries

- SMN's exposure to oil and gas related activity is mainly;
  1. Exposure to the Offshore Service Vessel segment (OSV) – capital intensive industry
  2. Shipyards - OSV, fishing vessels, wellboats and RoRo
  3. Exposure to other maritime industries – mainly producers of maritime equipment and engineering companies. Less capital intensive activities and for the shipyards mainly project finance with low risk for SMN.
  4. Directly and/or indirectly by tenants that are oil and gas related. SMN has a relatively small market share in the retail market in Møre & Romsdal where there are considerably more oil and gas related jobs than in Nord-Trøndelag and Sør Trøndelag.

-> **SMN's exposure are mainly related to Offshore Service Vessels.**

- Excluding barges we finance around 70 vessels (100% or less) where 14 vessels are in the spot market or have contracts with expiry in 3Q 2015. In addition 2 vessels are p.t. laid up.
- The vessels in the spot market are mainly part of larger portfolios with good contract coverage
- 85% of the exposure is related to PSV, AHTS and subsea vessels - 15% to barges / seismic vessels. The PSV and subsea segments have a share of 37% each.
- The portfolio has a contract coverage that is better than the total Norwegian OSV fleet
- Relatively young fleet compared to benchmark and the total market
- The portfolio as low risk (PD) and good risk adjusted return
- 7 company groups with exposure above 500 mnok – none above 1 bill.
