

Larox introduces new brochures on the company's filter product range

Larox has recently introduced a set of brand new brochures covering the full range of Hoesch membrane filter presses, Larox DS Series automatic pressure filters and Scheibler polishing filters.

The new, easy-to-read brochures on the Hoesch, Larox DS Series and Scheibler filters provide comprehensive information on the operation of the filters, the range of process options, benefits of the filters, the range of applications and the size ranges available. Details on various special features plus all the options, ancillaries and engineered packages available from Larox are also provided. The brochures also contain information on testing and after sales service capabilities.

With all of its products Larox is committed to helping its clients meet the following goals

- Reduced lifetime production costs – especially energy based costs
- Improved product quality, value and consistency

- Improved safety, health and environmental performance
- Improved yield and productivity

As with all Larox products, the Hoesch, Larox DS Series and Scheibler filters are fully supported by the Larox Service, the most comprehensive and experienced network in the industry, covering the world with operations in over 40 countries and providing reliable support throughout the entire lifecycle of the product.

About Larox Group

Larox is a leading innovator and supplier of solid/liquid separation solutions for the world's process industries. Companies in mining and metallurgy, chemical processing and related industries benefit from our high-performance, high-efficiency

process solutions, technologies and products. Larox operates in over 40 countries and has over 450 employees. Larox Group is headquartered in Lappeenranta, Finland.

Our major product names are Larox, Ceramec, Hoesch, Pannevis and Scheibler. Most of the product names have served the markets for several decades, and they are supported by Larox aftermarket services.
