IT – SAXESS - Request for disconnecting from unused connections

The Equity and Warrant markets in SAXESS were migrated into INET Nordics trading system on February 8, 2010. Now it's time for us at NASDAQ OMX Nordic to release unused SAXESS resources.

Our Saxess Operations team is currently working on making Saxess Production and external test system SACTST3 able to handle the Fixed Income Markets more effective.

There are two main areas to focus on:

- 1) Some of our customers' "old" SAXESS test- and prod connections are still logged on to SAXESS PROD and to SACTST3. Therefore we kindly ask you to disconnect your old production and test connections from the SAXESS prod- and test environments that were used for connections to equities and warrants.
For guidance please refer to the table of ports below:

SAXESS PROD

TE	DDS
192.176.3.138: 20900 & 20901	192.176.3.130:22900
192.176.3.170: 20900 & 20901	192.176.3.162:22900

SACTST3

TE	DDS
192.176.3.129:20020 & 20021	192.176.3.131:22020
192.176.3.161:20020 & 20021	192.176.3.163:22020

- 2) **As from June 9 - Disconnection of Partition 3 on SACTST3**
Partition 3 will be disabled from SACTST3 as from June 9.

Extremely Important! To be 100% sure when doing this disconnection also in SAXESS PROD (tentatively date end August), you must give us feedback on any upcoming problems related to this measure on SACTST3.

Questions and feed-back
