

Micronic Mydata receives order for a Sigma7500 laser pattern generator from an Asian customer

Täby, Sweden – June 14, 2010 – Micronic Mydata AB (publ.), listed on NASDAQ OMX Nordic Stockholm, Small Cap: MICR, today announced an order for a Sigma7500 from an Asian customer. The system is scheduled for delivery during the second half of 2010.

“The order confirms that Sigma7500 is an effective way to lower costs for volume production of photomasks at leading edge nodes,” said Peter Uddfors, president and CEO for Micronic Mydata AB. “We are very pleased to see that this customer has chosen Sigma7500 from Micronic Mydata, following an extensive evaluation.”

The Sigma7500 meets the stringent requirements for resolution and accuracy at advanced technology nodes and provides productivity that is substantially higher than that offered from e-beam pattern generators. Lower cost and turn-around time will in the end reduce cost and time-to-market for IC manufacturers.

About Micronic Mydata AB

Micronic Mydata AB is a Swedish high-tech company engaged in the development, manufacture and marketing of a series of extremely accurate laser pattern generators for the production of photomasks and advanced surface mount technology (SMT) equipment for flexible production of electronics. The pattern generators are used by the world's leading electronics companies in the manufacture of television and computer displays, semiconductor circuits and semiconductor packaging components. The SMT equipment, including software applications, is used for surface mounting of electronic components and stencil free jetting of solder paste. Micronic Mydata headquarters is located in Täby, north of Stockholm and at present the Group has subsidiaries in China, France, Germany Japan, Singapore, South Korea, Taiwan, the Netherlands, United Kingdom and the United States.
