

IT 82/10

IT - Genium INET for Nordic Derivatives and Fixed Income – project update

The coming production environment for Genium INET for testing **Site A** (Site B will open on Monday 28 June) is open. We have also the past days published a number of updates and revisions of the Genium INET documentations including new beta versions of the Trading and Clearing workstations.

The member extranet

(http://nordic.nasdaqomxtrader.com/memberextranet/genium_inet/) contains the newest project related documentation such as API changes, connectivity information, test specifications and market model documents.
