

## PRESS RELEASE

28<sup>th</sup> June 2010

### **THRANE & THRANE TO LAUNCH NEW, IN-HOUSE DEVELOPED SAILOR VSAT ANTENNA AT SMM 2010**

The SAILOR 900 VSAT, a sophisticated new Ku-band VSAT antenna, will be launched by Thrane & Thrane at the forthcoming SMM 2010 exhibition in Hamburg this September.

Designed in-house by Thrane & Thrane's experienced engineers, SAILOR 900 VSAT represents a leap-forward in VSAT antenna performance and benefits from the high reliability, build quality and functionality that has made SAILOR the leading name in the world of maritime communications.

"SAILOR 900 VSAT is an important milestone in our strategy to support the maritime broadband market with high quality products," comments Casper Jensen, Vice-President Maritime Business Unit, Thrane & Thrane. "It complements our highly successful and market dominant Inmarsat FleetBroadband family, and our recently launched SAILOR Satellite TV systems whilst establishing a strong platform for future developments in the VSAT arena."

SAILOR 900 VSAT is designed and built to the exact same standards as Thrane & Thrane's SAILOR terminals for Inmarsat services, which have become the de facto industry standard in the professional maritime industry thanks to their reliability, suitability for the harsh maritime environment and the high-levels of global support offered by Thrane & Thrane.

Like SAILOR FleetBroadband products, SAILOR 900 VSAT has been designed with ease of installation in mind. It is a powerful, quick and easy-to-deploy four-axis stabilized Ku-band VSAT antenna featuring a low-profile and high performance RF design. It can be easily integrated with all leading VSAT modem units and the sophisticated Antenna Control Unit (ACU) features multiple LAN and diagnostics ports, and Built-in Test Equipment (BITE).

The SAILOR 900 VSAT is going to be the fourth in the line-up of SAILOR Ku-band products, which include the SAILOR 700 VSAT, SAILOR 60 Satellite TV and SAILOR 90 Satellite TV.

To find out more about the SAILOR 900 VSAT and Thrane & Thrane's complete range of maritime radio and satellite communication systems visit the company in hall B6, stand 333, at SMM 2010 in Hamburg, from 7<sup>th</sup> – 10<sup>th</sup> September 2010.
