## ReadSoft and Matrisen signs partner agreement

***Matrisen, one of Sweden's leading accounting companies, has signed a partner agreement with ReadSoft. The agreement means that Matrisen will market and sell ReadSoft's cloud-based data capture solution – WEBEYE. This solution is a platform for service handling via the Internet and will give Matrisen's customers access to ReadSoft's world leading invoice automation solutions without having to install the IT infrastructure themselves.***

With more than 3000 clients, Matrisen is one of Sweden's leading companies within accounting, payroll administration and financial advisory services for small and medium-sized organizations. The cooperation agreement makes it possible for Matrisen to offer ReadSoft's world leading invoice automation handling solutions via the cloud-based data capture solution – WEBEYE. One of the current trends in software development is that software no longer is installed locally, but instead hosted on an external server. This is called cloud computing or Software as a Service. With WEBEYE, ReadSoft offers this service via a web based interface. With the access to WEBEYE, Matrisen's market offering is strengthened which enhances their capability to build on the success they have today on the market for small and medium-sized organizations.

"Cloud based data capture with WEBEYE eliminates the problems with a large, resource intensive IT-infrastructure that requires dedicated labor for system administration and time-consuming manual operations," says Tor Holmgren, Business Area Manager for Change Management at Matrisen. "By using WEBEYE, our clients can more or less eliminate initial investments and by doing so, reduce their costs at the same time as their business and workflow becomes more efficient."

"WEBEYE makes automated invoice handling available for everybody, and is easy to manage and get started with," says Björn Karlsson, Managing Director at ReadSoft Software Services AB. "Cloud based data capture with WEBEYE stops paper usage early in the invoice handling process, lets users share information, access their invoices anywhere at any time, and create effective processes together with their accounting firm."

"The cooperation agreement with Matrisen is a clear indication that our solution for cloud based data capture solutions lies in the forefront," says Jan Andersson, CEO for ReadSoft AB. "Small and medium-sized companies will be able to make their operation considerably more efficient especially as they don't have to spend valuable time on installing, configuring and supporting the software."
