**IT 89/10**

**IT - Genium INET for Fixed Income project update**

The member extranet ([http://nordic.nasdaqomxtrader.com/memberextranet/genium\\_inet/](http://nordic.nasdaqomxtrader.com/memberextranet/genium_inet/)) has now been updated with the newest Genium INET Fixed Income project related documentation.

As earlier communicated, the master time schedule for Genium INET Fixed income includes the possibility to download reference data through OMnet by August 9th.

We have now migrated data from SAXESS Production (6 July) to Genium INET External test system 2. The data migrated is the SAXESS Fixed Income market participants and users (SAXESS user accounts and sessions) as well as the market structure (exchange, market, instrument group and instrument type).

The passwords for the accounts have changed, contact [memberservices@nasdaqomx.com](mailto:memberservices@nasdaqomx.com) to receive the new passwords.

**Please note, this environment is for Fixed Income only, and will be open for reference data download on August 9th. The environment will be merged at a later stage with Genium INET Test environment 3.**

Please ensure you have prepared connectivity to the test environment:

Test environments	IP	Port	Purpose
Genium INET External test environment 2 (Fixed Income)	192.176.3.153	6124	Trading applications
		6127	Clearing applications
		6130	Troubleshooting

Current Genium INET Fixed Income documents as of 9<sup>th</sup> of July on our member extranet, under "Connectivity and protocols":

- Genium INET Connectivity guidelines for Fixed Income
- Genium INET Market model for fixed income (Market Model tab)
- Genium INET Reporting guidelines for Fixed Income (Market Model tab)
