

Press release 2010-08-18

New functionality and detector system was successfully exhibited at AAPM in Philadelphia.

C-RAD AB with its three fully owned subsidiaries are all active in the field of radiation therapy. The company attended and exhibited at the annual physicist meeting AAPM in Philadelphia, USA, 18-21 July. The GEMini and Sentinel systems were presented in the C-RAD booth. The Sentinel system was also exhibited in the Elekta booth with the robotic couch Hexapod Evo.

The annual physicist meeting AAPM in the US is one of the major events in radiation therapy. The main focus for C-RAD this year was to introduce new software functionality for respiratory gating and to present the GEMini ED system. Both systems are FDA- pending. The meeting was a success. Compared to last year's meeting number of leads doubled. Both the ROS representative and the new C-RAD sales manager in the US were busy in demonstrating the unique features of the Sentinel system. New orders for the Sentinel system were signed.

This important meeting is also offering an opportunity to meet partners and representatives. Both technical and commercial discussions took place to integrate the C-RAD systems with the systems of the main vendors in radiation therapy.

Erik Hedlund, CEO, C-RAD AB:

"USA represents almost 50% of the world market in radiation therapy. Success on this market has also a positive impact on sales in rest of the world. To penetrate this market, investment in marketing and sales will be further increased."

About C-RAD AB

C-RAD develops new and innovative solutions for the use in advanced radiation therapy. The company group of C-RAD offers products and solutions for patient positioning, tumor localization and radiation treatment systems. End users are radiation therapy clinics worldwide. All product development is conducted in three fully owned subsidiaries; C-RAD Positioning AB, C-RAD Imaging AB and C-RAD Innovation AB. C-RAD Imaging AB is located in Östersund while the other companies are located in Uppsala. Numbers of employees are currently 19 people. The activities in C-RAD AB originate from research and development at the Karolinska Institute in Solna. Sales of the company's first product, the C-RAD Sentinel™, started in 2007. Cooperation agreements have been signed with the Swedish company Elekta and the Belgian company IBA. C-RAD is represented by distributors specialized in radiation therapy on major markets. C-RAD AB is since March 2010 listed at Nasdaq Omx First North Premier.
