Seamless to show their self developed Mollet™ at the Mobile World Congress 2011 in Barcelona

The Swedish software company Seamless will show Mollet™, their self developed solution that transforms the mobile phone into a combination of wallet and bank account during the Mobile World Congress in Barcelona in February. The Mollet™ makes it possible to use the mobile phone when performing simple bank transactions such as deposits, withdrawals and money transfers to other mobile phones. The mobile can also be used to purchase products and services.

“Enabling payment via the mobile phone is key in developing a functioning payment system in developing countries. We believe our Mollet™ solution can play an important part in this development”, says Rohit Bhatia, CEO Seamless.

The Seamless’ booth is located in the *Mobile Money Pavilion, booth 7MM20 in the App Planet, hall 7*. Product specialists, technical specialists and solution architects will be present to answer questions as well as perform demos on location. Rohit Bhatia, CEO will also be present in the booth.
