Internal control

Aspo's internal control includes the control that is built in to the business processes, the Group's management system and financial reporting covering the entire Group. Internal control is an integral part of the company's management, risk management and administration.

The aim of internal control is to create sufficient certainty of goals and objectives being reached in the following issues:

- operational profitability and efficiency and capital control
- reliability and completeness of financial and operational information
- compliance with laws, regulations and agreements, as well as ethical principles and social responsibility
- securing and responsible management of assets and brands

The responsibility to arrange the control lies with the Board and the CEO both at Group level and in the different business areas. The Group's Board is responsible to the shareholders and the CEO to the Board. The chain of responsibility continues throughout the organization so that each Aspo employee is responsible to his/her superior for control. Group company controllers have supervision responsibility concerning compliance with legislation and Group instructions. As well as the sector management, they also report to the CFO. The CFO reports to the CEO and Board on possible findings. The internal control functions support the Group management in their control task and the aim is to offer the Group management sufficient surety that the control is working.

Financial reporting

The control of financial reporting is based on monitoring of business processes. The information for financial reporting is created as business processes progress, and responsibility for correct information is shared by all participants in the process. The financial reporting process is decentralized and monitored by the Audit Committee.

The financial statements of the Group are compiled according to the IFRS standards; those of the parent company and Finnish subsidiaries according to the FAS standards. Each separate company complies with the legislature of the country where it is located, but reports based on the Aspo's internal accounting regulations. Separate companies may have their own accounting framework, but all information is consolidated on the basis of a common framework to the business area level, where their reliability is assessed and then transferred to Group level. Aspo Group's information is verified, and assessed on monthly basis. At each phase the unit responsible for the quality and generation of information will assess its reliability. The Group-level inspection and balancing mechanisms are used on both monthly and quarterly bases.

The systems required for financial reporting are decentralized and used according to the principles

of internal control of Aspo Group. Achieving the set targets is followed on a monthly basis with the reporting system. In addition to actual and comparison figures, it provides up-to-date forecasts. The reports are provided to the Aspo Board of Directors monthly. The Board of Directors assesses the Group's position and future based on the provided information. The Board of Directors is responsible for the contents and publication of the financial statement.

In 2010, the Group continued to update and integrate the reporting systems in order to improve the level of internal control.

Besides internal control, the reliability of reporting and processes are assessed by an independent, external audit corporation.

Internal auditing

The purpose of internal auditing is to support evaluation and confirmation of the Group to verify the efficiency of risk management, control, management and administration. Internal auditing assists the Board of Directors and organization in achieving the Group targets and in ensuring and developing the control system.

The Board of Directors approves the principles of internal auditing as part of internal control. The Group CFO is responsible for internal auditing, and reports the findings to the CEO and the Board of Directors. Internal auditing is organized corresponding to the size of the Group. Externally purchased services with special skills will be used for demanding assessments. The target is to accomplish two or three risk-based audits annually. The audits are based on risk assessment as defined in the risk analyses of individual business units. The objects of the assessment and auditing process are profitability and efficiency of activities, reliability of financial and activity reporting, compliance issues and securing of assets.

Risk management

The target of risk management is to ensure the fulfillment of Group strategy, development of financial results, shareholder value, dividend payment capability and business continuity. The operational management of the business areas is responsible for risk management. The management is responsible for defining sufficient measures and their implementation, and for monitoring and ensuring that the measures are implemented as part of normal operational control. Risk management is coordinated by the Group's CFO, who reports to the Group CEO.

Each business area has a separate risk management program and a corresponding business continuity plan. Business risks and their management are dealt with in the executive teams of the business units. The functions common to the whole Group will ensure that sufficient risk assessment and reporting procedures are incorporated into the processes they are responsible for. In terms of risks, the risk management principles and main content have been defined in Group-level policies and guidelines. The Group management is responsible for Group-level insurance policies.

Risk management is essentially based on the aforementioned procedures of internal controls, where the chain of responsibility extends throughout the Group. The most important factors in business risk management are a profound understanding of the business and command of the tools which are used for daily business operations and their control. Characteristic risks in each business area are identified in the business units, assessed in the business unit management teams, and reported to the units' Boards and, if need be, also to the Aspo Board of Directors or the Audit Committee. The Group CEO acts as the chairman of the Boards of Group companies.

Risks are continuously assessed and their management is discussed in the business unit executive teams. Risk assessments are updated according to Aspo's management policy and the

most noteworthy findings are presented in the quarterly interim reports. Larger projects always include a separate risk analysis. The most significant risks for the Group are assessed once a year and the results are presented in the annual report.

Financial risks and the management principles and organization of financial risks are presented in the Notes to the Financial Statements, in the Annual Report.
