ÅF signs consultancy agreement with Holmen for a new biofuelled power plant in Workington, UK.

ÅF has signed a major consultancy contract with Iggesund Paperboard (Workington) Ltd.

Igesund Paperboard is part of the Swedish forest industry group Holmen.

Igesund Paperboard will build a new biomass-fuelled CHP (Combined Heat and Power) plant at its Workington paperboard mill in Cumbria, UK. The power output of the CHP plant will be approximately 50 MWe and 80 t/h steam, which will be delivered to the adjacent paperboard mill. After completion of the project, all power and steam generated for the mill will be based on renewable biofuels. The fuels will be fresh wood in chips or logs, bark and sawdust.

The ÅF assignment includes project management, engineering, procurement, as well as site construction and commissioning management services. The project starts immediately, and commercial operation is scheduled to start in March 2013.

Corporate Information
ÅF AB

The ÅF Group is a leader in technical consulting, with expertise founded on more than a century of experience. We offer highly qualified services and solutions for industrial processes, infrastructure projects and the development of products and IT systems. Today the ÅF Group has more than 4,500 employees.
