About NunaMinerals

NunaMinerals A/S is Greenland's leading company in the exploration of gold and other precious and base metals. The company has a portfolio of 16 exclusive concessions that to date comprise 40 exploration prospects.

Firmly rooted in Greenland, the company is well positioned to exploit the minerals potential of one of the world's final unexplored areas. The geology of Greenland has a number of similarities with that of mining countries such as Canada, South Africa and Australia, all countries with substantial mineral deposits of, among other things, gold, platinum, nickel and copper.

The company has established partnerships with, among others, the world's second-largest mining company, Rio Tinto, and the world's second-largest platinum producer, Implats. Setting up partnerships that may add further technical and financial expertise to the development of the company's exploration prospects is a key element of NunaMinerals' business model.

NunaMinerals began operations in 1999 and is headquartered in Nuuk, Greenland. The company is listed on the OMX Nordic Exchange Copenhagen under the symbol "NUNA".
