

INTERIM REPORT, Q2 2011

"A fall in NTD revenue, a change in the product mix in contract customer orders and a delay of the 6" product qualifications produced a low level of activity in the quarter, and it will affect H2 2011 and results in a downgrade of our profit forecast for the year. This is unsatisfactory, and so we further increase our efforts to qualify new PFZ and CZ-EPI customers, cut costs and improve efficiency. The long term growth scenario remain unchanged."

KELD LINDEGAARD ANDERSEN

Chief Executive Officer

24-08-2011

NASDAQ OMX Copenhagen · Nikolaj Plads 6 · 1067 København K

Today, the Board of Directors of Topsil Semiconductor Materials A/S considered and approved the interim report for the six months ended 30 June 2011. The highlights of the interim report, which is unaudited, are:

SUMMARY FOR Q2 AND H1 2011

Revenue and earnings

- Topsil's revenue decreased from DKK 113.1 million in Q2 2010 to DKK 103.7 million in Q2 2011, corresponding to a drop of 8.3%. Accumulated revenue for H1 2011 amounted to DKK 195.6 million, equal to negative organic growth of 9.4%. The main reasons for this development is a decline in the NTD area and a delay in the product restructuring from CZ to CZ-EPI.
- At the beginning of Q3, Topsil received substantial downwards adjustments and changes in the product mix of NTD orders for the remaining part of 2011. Management believes that the decline is specific to selected applications, industries and contract customers.
- Despite a level of activity which in 2011 will be below the expected level, Topsil believes that the company will maintain its market position and that the underlying market for both FZ and CZ products in the longer term will continue to match the favourable market growth forecasts.
- The product restructuring from CZ to CZ-EPI is delayed due to technical challenges with approval and ramp up of CZ-EPI products to new customers. Sales of CZ-EPI have therefore not been able in the short-term to compensate for the expected reduced sales of CZ.
- Topsil received confirmation from a number of new and existing customers for the approval of the new PFZ product. However, the approval process is still more time-consuming than expected.
- Topsil had some production related challenges in Q2, most notably were quality issues with one
 of the two suppliers of FZ polysilicon for NTD production. This generated a lower degree of
 utilisation and a longer production process, and thus increased production costs at about DKK 5
 million. Topsil is working hard to solve the problem in collaboration with the supplier.
- To adjust the cost level, Topsil reduced staff numbers and strengthened efforts to achieve synergies between the Danish and Polish locations in Q2 2011.
- In H1 2011, the group accelerated the development of 8" crystal, and expects that a fully developed crystal will be in place as planned before the end of the financial year, aiming for qualification and market introduction in 2012.
- Construction of a new plant continues according to plan. In 2011, Topsil expects to spend about DKK 200 million on the investment programme, in accordance we previously decided investment plans.
- The lower level of activity and impaired quality of FZ polysilicon means that the group's EBITDA in Q2 2011 fell from DKK 23.4 million last year to DKK 6.7 million this year, equal to an EBITDA margin of 6.4% compared to 20.7% in the year-earlier period. EBITDA for H1 2011 totalled DKK 19.0 million against DKK 43.5 million for the year-earlier period.
- Topsil reported an unsatisfactory profit before tax of DKK 6.7 million in H1 2011 against DKK 36.0 million for the year-earlier period.
- The company reported a net cash outflow from operating activities of DKK 1.6 million in H1 2011 against DKK 40.4 million in the year-earlier period, following the negative development of operating profit.

Outlook for 2011

Due to a low level of activity in H1 2011, large changes in the product mix in the order book for H2 2011 and delay of approval of 6" PFZ and CZ-EPI products, the profit forecast for 2011 is downgraded. Previously, Management expected an organic growth rate of 0-5%, but now revenue is expected to decline approximately 20% to about DKK 370 million. Consequently, the operating profit (EBTIDA) forecast is downgraded from about DKK 100 million to about DKK 40 million.

MANAGEMENT REPORT

Topsil's revenue decreased from DKK 113.1 million in Q2 2010 to DKK 103.7 million in Q2 2011, corresponding to a drop of 8.3%. The lower revenue was primarily due to order adjustments, changes in the product mix and production changes at NTD contract customers. In addition, revenue from new customers was lower than budgeted due to a delayed qualification of PFZ and CZ-EPI products. Accordingly, revenue for H1 2011 amounted to DKK 195.6 million, corresponding to negative organic growth of 9.4% compared to the year-earlier period.

The lower level of activity and the impaired quality of FZ polysilicon for NTD production are the main reasons for the fall in the group's operating profit in Q2 from DKK 23.6 million last year to DKK 6.7 million this year. Topsil will therefore further intensify focus on cost cuts and other optimisation of operations.

Underlying market perspective unchanged despite short-term changes in order books

Despite a level of activity which in 2011 will be below the expected level, Topsil believes that the company will maintain its market position and that the underlying market for both FZ and CZ products in the longer term will continue to match the favourable market growth forecasts. This is confirmed by the interest in Topsil's new 6" PFZ product and in the development activities within 8" NTD and PFZ. In H1 2011, the group has accelerated the development of 8" crystal, and we expect, as planned, that a fully developed crystal will be in place before the end of the financial year, aiming for qualification and market introduction in 2012.

Setback in the NTD market

At the beginning of and after Q1 2011, NTD contract customers' sales forecast was in line with last year's. At the end of Q2 2011, however, the NTD order inflow developed negatively in respect of applications for infrastructural projects. Topsil received adjustments of existing orders and experienced a decline in the number of new orders from several customers. This trend continues at the beginning of Q3 2011.

While NTD sales within industrial applications were stable in H1 2011, expectations for the transport area, where Topsil has a very large market share, have been significantly

160.0 Net revenue mDKK)KK 140.0 120.0 100.0 80.0 60.0 40.0 20.0 0.0 01 02 03 04 01 Q2 avg. 12 Months 2011

lowered for the rest of the year. The reason is that a number of Topsil's NTD customers are affected directly by the Chinese Ministry of Transport's considerations to reduce the speed of high-speed trains from over 300 kilometres an hour to under 250 kilometres an hour. This will have a material negative impact on Topsil's budgeted sales in H2 2011, and generates reduced visibility on a 6-9 month horizon for the order book.

Confirmed approval by a number of customers within PFZ

The sale of the new PFZ product with better technical qualities was, as expected, limited during H1 2011, when activities were focussed on achieving the customers' approval of the product.

In Q2 2011, Topsil received confirmed approval from a number of new and existing customers. However, the process from introduction to qualification over the production ramp and volume production was more time-consuming than originally anticipated due to prolonged development and verification processes, internally and at the customers.

Topsil's sales work confirmed a noticeable growth in demand for medium voltage solutions. Yet, PFZ revenue will not be greater in 2011 than in 2010 due to the delayed approval process.

Low CZ revenue caused stronger quality and efficiency efforts

CZ revenue amounted to DKK 21.7 million in Q2 2011 against DKK 24.7 million last year. Revenue for H1 2011 amounted to DKK 40.0 million, equal to a drop of 13,2%.

Revenue was lower than first expected and was due to a delay in CZ-EPI sales to existing and new customers. The product restructuring from CZ to CZ-EPI was more prolonged than initially assumed due to technical challenges with approval and ramp up of CZ-EPI products to new customers. Sales of CZ-EPI was therefore not able to compensate for the expected reduced sales of CZ in the short-term. To speed up the process, Topsil will strengthen quality and efficiency efforts in H2 2011.

We still expect Topsil's product mix of CZ and CZ-EPI to be CZ: 30-40% and CZ Epi 60-70%, respectively in 2011, however on a lower level.

Reduced earnings due to lower activity and deviations in the quality of polysilicon

EBITDA for Q2 2011 amounted to DKK 6.7 million against DKK 23.4 million in Q2 2010. EBITDA margin for the quarter was thus 6.4% against 20.7% last year. Overall, EBITDA for H1 2011 was DKK 19.0 million corresponding to an EBITDA margin of 9.7% compared with DKK 43.5 million and an EBITDA margin of 20.2% in H1 2010. Operating profit for the quarter was significantly lower than the expected level and reflects the decrease in the activity level.

Topsil had some production related challenges in Q2, most notably were quality issues with one of the two suppliers of FZ polysilicon for NTD production. This generated a lower degree of utilisation and a longer production process, and thus increased product costs by approximately DKK 5 million. Topsil is working intensively with the supplier to fix the quality, but production in H2 2011 is still expected to be affected due to the length of the production cycle.

In Q2 2011, Topsil reduced staff numbers, deferred a number of new hirings and strengthened efforts to achieve synergies between Topsil and Cemat. These efforts are expected to result in savings of DKK 10 million in H2 2011, which is included in the expectations for the year.

As a result of the unsatisfactory trend in operating profit, Management is increasing focus on cost adjustments, especially at Cemat. The managerial positions and directorships in Topsil and Cemat will be merged and, in addition, a number of measures will be initiated to increase output and ensure an efficient and competitive cost level.

Topsil's EBIT for Q2 2011 was DKK 2.0 million against DKK 20.9 million in Q2 2010. EBIT for Q1 2011 was DKK 10.0 million, corresponding to an EBIT margin of 5.1% compared with an EBIT of DKK 37.2 million and an EBIT margin of 17.2% in Q1 2010.

Net financials amounted to an expense of DKK 1.0 million in Q2 2011 and an expense of DKK 3.2 million in H1 2011, comprising net interest expenses of DKK 0.5 million and an expense of DKK 2.8 million from realised and unrealised capital losses.

Topsil reported an unsatisfactory profit before tax of DKK 1.0 million in Q2 2011 against DKK 17.2 million for the year-earlier period. Profit before tax amounted to DKK 6.7 million for H1 2011 and profit after tax amounted to DKK 3.8 million for H1 2011, compared with a profit before tax of DKK 36.0 million and a profit after tax of DKK 26.8 million for H1 2010.

Total assets and interest-bearing debt

At 30 June 2011, Topsil's total assets amounted to DKK 592.8 million, against DKK 693.2 million at 30 June 2010 and DKK 592.3 million at 31 December 2010.

Net working capital at the balance sheet date amounted to DKK 138.5 million, which was an improvement of DKK 6.3 million compared with the year-earlier period. The main reason for the improvement was the increase of DKK 11.7 million in inventories as a result of increased planned activity. Receivables fell by DKK 14.3 million compared to one year ago, while trade payables declined moderately.

Net interest-bearing debt at 30 June 2011 amounted to an asset of DKK 34.3 million compared with an asset of DKK 92.6 million at 1 January 2011 and DKK 66.0 at 30 June 2010. The change was mainly due to a higher level of investment in property, plant and equipment as a result of the acquisition of land for and construction of a new plant.

Cash flows from operating activities

The company reported a net cash outflow from operating activities of DKK 1.6 million at 30 June 2011 compared with a net inflow of DKK 40.4 million at 30 June 2010. The change was mainly attributable to a drop in operating profit from DKK 37.2 million last year to DKK 10.0 million this year, while a planned increase in inventories contributed to an increase in net working capital.

After net investments totalling DKK 39.4 million in H1 2011, the group's total cash flow was a net outflow of DKK 41.8 million. Cash and cash equivalents amounted to DKK 48.6 million at 30 June 2011.

Construction of a new plant continues according to plan

Construction of Topsil's new plant in Frederikssund began in April and will continue until June next year, after which transfer of machinery, equipment and staff will begin. In 2011, Topsil will as planned use a total of around DKK 200 million in property, plant and equipment, most of it for the new plant.

Profit forecast downgraded

Due to a low level of activity in H1 2011, large changes in the product mix in the order book for H2 2011 and delay in current approval of 6" PFZ and CZ-EPI products, the forecast for 2011 is downgraded. Previously, Management expected an organic growth rate of 0-5%, but now revenue is expected to decline approximately 20% to about DKK 370 million. Consequently, the operating profit (EBTIDA) forecast is downgraded from about DKK 100 million to about DKK 40 million.

These expectations are based on exchange rates of DKK 525/USD 100 and DKK 190/PLN 100.

This interim report has been prepared in Danish and translated into English. In the event of any discrepancy between the Danish text and the English-language translation, the Danish interim report will prevail.

STATEMENT BY THE BOARD OF DIRECTORS AND MANAGEMENT

The interim report, which is unaudited, is presented in accordance with the current recognition and measurement provisions of the International Financial Reporting Standards (IFRS) as adopted by the EU and additional Danish disclosure requirements for interim reports of listed companies.

We consider the accounting policies applied to be appropriate to the effect that the interim report gives a true and fair view of the group's assets, liabilities and financial position at 30 June 2011 and of the results of the group's operations and cash flows for the six months ended 30 June 2011.

In our opinion, the Management's report includes a fair review of the development and the performance of the group's business and financial situation, the financial results for the period and of the group's financial position in general and gives a fair description of the significant risk and uncertainty factors that it faces.

The cash flow statement is calculated inclusive of assets and liabilities held for sale

NOTES TO THE FINANCIAL STATEMENTS

Accounting policies

The interim report is presented in accordance with the recognition and measurement provisions of the International Financial Reporting Standards as adopted by the EU and additional Danish disclosure requirements for interim financial reports of listed companies, cf. IFRS 34 "Interim Financial Reporting", issued pursuant to the Danish Financial Statements Act and the guidelines of the NASDAQ OMX Copenhagen.

The interim report is unaudited and unreviewed. The accounting policies are consistent with those applied in the annual report for 2010. See the annual report for 2010 for a comprehensive description of the accounting policies.

Judgments and estimates

The preparation of interim reports requires Management to make accounting judgments and estimates that affect the accounting policies applied and the assets, liabilities, income and expenses recognised. Actual results may differ from these estimates. The most significant estimates made by the Board of Directors and Management in applying the group's accounting policies and the most significant uncertainty attached thereto are the same as those applying to the preparation of the annual report.

Significant financial risks

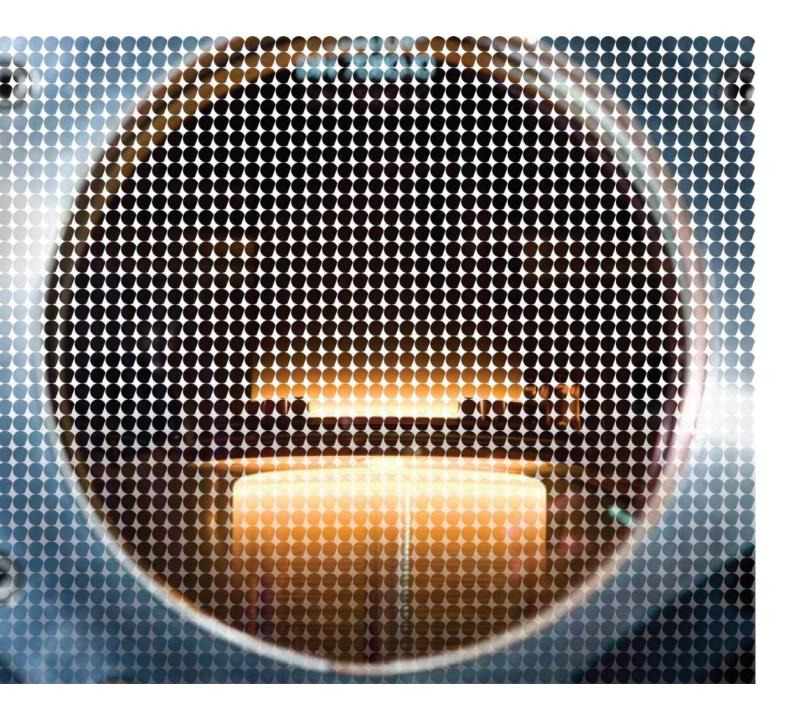

Currency risks comprise the risk of loss (or the possibility of gain) when exchange rates change. Currency risks arise when income and expense items in foreign currency are recognised in the income statement or from value adjustment of balance sheet items denominated in other currencies.

A substantial part of the group's sales takes place in USD and EUR. Raw materials etc. are also typically purchased in USD and EUR, whereas other cost items are typically incurred in DKK or PLN. The group does not use derivative financial instruments to hedge currency risks regarding cash flows or balance sheet items. Instead, the group uses foreign currency to settle same currency debt items, which generally reduces the currency risk. A currency fluctuation in USD/DKK of \pm DKK 0.50 would subject the group to a currency risk of about \pm DKK 2.1 million based on the balance sheet items in USD at the balance sheet date. Similarly, a currency fluctuation in PLN/DKK of \pm DKK 0.20 would subject the group to a currency risk of about \pm DKK 0.1 million based on the balance sheet items in PLN at the balance sheet date. The group's currency risk in connection with fluctuations in EUR/DKK is considered immaterial.

Events after the balance sheet date

No significant events have occurred after the balance sheet date.
