Company classification standard

NASDAQ OMX adopts ICB Company classification standard globally

NASDAQ OMX has decided to adopt the ICB (Industry Classification Benchmark) standard globally, effective as of February 1st, 2012. The NASDAQ OMX exchanges in Stockholm, Copenhagen, Helsinki, Reykjavik, Tallinn, Riga, and Vilnius will adopt ICB which is the current standard on the NASDAQ OMX exchanges in the US.

“As a result of this action, our listed companies can more effectively benchmark with global peers, a total of 75,000 securities, compared to 40,000 previously. It also enables us to create consistent and comprehensive global indexes, enabling individual and institutional investors to quickly, accurately, and objectively measure and invest in the market”, Jenny Rosberg, Senior Vice President Global Corporate Client Group at NASDAQ OMX says.

ICB is a widely used global standard for company classification, with four levels of granularity - industry, supersectors, sectors and subsectors. The transparent and comprehensive system is adopted by stock exchanges around the world, representing over 65 percent of the world’s market capitalisation. With over 75,000 securities across 73 countries, ICB provides extensive geographic reach, offering investors the widest choice, for the purposes of benchmarking, performance measurement or research/analysis. The ICB standard is maintained by the FTSE Group.

All NASDAQ OMX local and regional sector indexes, based on the GICS structure, will be discontinued as of February 1st, 2012, and replaced by equivalent indexes based on the ICB structure, including more than 10 years of historical data.

All selected indexes, such as the Benchmark-series and Tradable Sectors, will have their selection methods revised early 2012. The revised rules will be made effective in connection to the mid-year reviews in June, 2012.

More information on: www.nasdaqomx.com/classificationchanges

Market Data

The ICB standard will replace the current GICS standard in the NASDAQ OMX Nordic & Baltic market data products. This will affect specifications and data content in both files and data feeds. The change of classification standard will also affect the Nordic & Baltic sector index content where new indexes will be added and obsolete indexes will be removed.

Please note that classification data provided by NASDAQ OMX are only for internal usage just as with the current GICS classifications. Clients are responsible for obtaining and maintaining any licenses, consents or permits required by the classification provider for other usage, for example re-distribution of this data. The Industry Classification Benchmark (ICB) is maintained by FTSE International Limited. Contact FTSE client services London: +44 (0) 20 7866 1810 or info@ftse.com

Index data

All NASDAQ OMX local and regional sector indexes, based on the GICS structure, will be discontinued as of February 1st, 2012, and replaced by equivalent indexes based on the ICB structure, including more than 10 years of historical data. Lists with new and old affected indexes will be published containing new ID-codes. The naming convention used for the new indexes will be similar to the current sector indexes, but the sector codes used in the index names will be based on ICB instead of GICS.

Genium Consolidated Feed (GCF)

In relation to the introduction of ICB data in GCF there will be a erratas made to the TIP 2.4.0 document. The changes are only affecting naming of fields (not tags) and descriptions and are related to the messages for sector data and the use of the term "GICS".

The ICB classification reference data will represent two levels of the total four available for the classification of listed companies.

All NASDAQ OMX local and regional sector indexes included in the Nordic Equity products and VINX products, based on the GICS structure, will be discontinued as of February 1st, 2012, and replaced by equivalent indexes based on the ICB structure. New source ID- and GCF ID-codes for these new sector indexes will be presented when available. These are preliminary dates for the introduction of new indexes:

- **December 5th, 2011** - Basic Data for the new indexes available in GCF production environment
- **January 9th, 2012** - Parallell dissemination of index updates for all new indexes in GCF

File Delivery Service (FDS)

The morning- & evening index weights morning reports in the Nordic and Baltic index weights products, and VINX index weights product will have the current GICS-column renamed and the data will be ICB-codes from February 1st, 2012. The field GICS will change name to ICB and be populated by the 4-digit ICB –code. The index- and file names will be changed to match ICB the standard.

Global Index Watch (GIW)

The industry breakdown section of GIW will after February 1st, 2012 be based on the ICB classification instead of the current GICS classification. The new sector indexes will be introduced and the current sector indexes based on GICS will be retired.

Q&A

When will it happen?

The new classification will be implemented effective February 1st, 2012.

Who's behind ICB?

The Industry Classification Benchmark (ICB) is maintained by FTSE International Limited.
FTSE client services London +44 (0) 20 7866 1810 or info@ftse.com

Will all the listed companies have to change?

Yes, this change has an impact across all Nordic and Baltic equity exchanges/markets operated by NASDAQ OMX:

- NASDAQ OMX Copenhagen
- NASDAQ OMX Helsinki
- NASDAQ OMX Iceland
- NASDAQ OMX Riga
- NASDAQ OMX Stockholm
- NASDAQ OMX Tallinn
- NASDAQ OMX Vilnius
- First North – (Copenhagen, Helsinki, Iceland, Riga, Stockholm, Tallinn and Vilnius)

How does this affect the indexes?

NASDAQ OMX Global Index Group will launch a new suite of local and regional sector indexes based on the ICB structure, as of February 1st, 2012. These indexes will have more than 10 years of historical data.

The current local and regional sector indexes will be terminated after the implementation of ICB as a classification standard.

Any other index that has a selection process that considers GICS will have its methodology updated in due time. As an example, the Benchmark indexes will be reviewed and rebalanced based on the current methodology (with GICS) in December 2011. An updated methodology (with ICB) will be made public in due time prior to the next ordinary semi-annual revision effective in June. Changes in the methodologies are communicated through public index notices and through Global Index Watch.

Will the introduction of ICB require changes to Genium Consolidated Feed and the TIP protocol?

Yes, the TIP protocol for Genium Consolidated Feed will be updated on naming and description level in relation to the migration from GICS to ICB standard. The updates will be presented in an errata document. No changes to TIP tags are required.

Will the files in File Delivery Service be impacted?

Yes, a description of the changes will be presented when available. The main change will be that the field GICS will change name to ICB and be populated by a 4-digit ICB –code.

I want to know more about these changes. Where can I get more information, who can I speak to?

Please contact Global Data Products: dataproductions@nasdaqomx.com

If you have specific question regarding indexes, please contact NASDAQ OMX Nordic Index Operations, +46 8 405 6296 or index@nasdaqomx.com

NEW PRODUCTS

NASDAQ OMX Nordic and Baltic markets

Fixed income derived data entitlement on pre- & post trade information

Starting December 1st, 2011 NASDAQ OMX Nordic allows for re-distribution of fixed income derived data via the Nordic Fixed Income Derived Data License. The Nordic Fixed Income Derived Data License covers unlimited re-distribution of data derived from Nordic Fixed Income pre- and post trade data.

Service Level	License Fee (per month)	Distributor Fee (per month)	Details
Nordic Fixed Income Derived Data Distribution - new original works. Enterprise License	€500	N/A	The right to utilize NASDAQ OMX Nordic fixed income real-time price and volume data (pre- & post trade) to derive new original works for unlimited distribution provided the new original works cannot be reverse engineered in any way back to the underlying NASDAQ OMX Nordic Equity market data.

NASDAQ OMX NORDIC & BALTIC EXCHANGES

Index

NASDAQ OMX to disseminate the new OMX Stockholm 30 Dividend Point Index

On November 7, 2011 NASDAQ OMX will begin disseminating a new index.

The OMX Stockholm 30 Dividend Index is calculated as the running total of ordinary dividends paid by the constituents of the OMX Stockholm 30 Index, expressed in index points. The index is reset to zero once a year in connection with the derivatives expiration. Using the OMX Stockholm 30 Dividend Index, investors can hedge/reach exposure to the dividend risk of the OMX Stockholm 30 Index.

The index values will be disseminated as an end of day index and be included in FDS, GIW, GIDS and Nordic index products.

Code	Name	Source ID	GCF ID	ISIN
OMXS30DVP	OMX Stockholm Dividend Point Index	5202	10892	SE0004270494

MARKET DATA SYSTEMS TECHNICAL FUNCTIONALITY

Genium Consolidated Feed

Orderbook message on Baltic fixed income

Some customers subscribing to the Baltic Equity and Fixed Income product have been receiving duplicate Orderbook messages in Genium Consolidated Feed. From Monday October 31st the product filters will be adjusted so that no duplicate Orderbook messages are disseminated.

Release Schedule

2011

NOVEMBER	
date	product/system
November 14th	Launch of UK Natural Gas futures
<p>NASDAQ OMX Commodities Europe will launch a new market in Genium Consolidated Feed: UK Natural Gas futures. The group of instruments on the UK Natural Gas futures market includes daily, weekly, monthly, quarterly and seasonal delivery periods.</p> <p>Affected systems: GCF, FDS</p>	
November 14th	Launch of Nordic Derivatives TotalView ITCH
<p>On November 14, 2011, NASDAQ OMX introduces an ITCH data feed for Nordic derivatives. The feed will display all levels of the order book, providing significantly more market insight than the current feed's 5 levels. In addition, the derivatives data comes directly from the trading system, with no holdback timers, making this the lowest-latency source for Nordic derivatives information.</p>	
November 28th	Genium Consolidated Feed TIP 2.4.0
<p>The next release of Genium Consolidated Feed version 2.4.0 will be in GCF production environment on November 28th, 2011. The TIP 2.4.0 specification is available on Genium Consolidated feed web page.</p> <p>Affected systems: GCF, FDS</p>	

2012

FEBRUARY	
date	product/system
February 1st	Introduction of ICB standards
<p>NASDAQ OMX has decided to adopt the ICB (Industry Classification Benchmark) standard globally, effective as of February 1st, 2012. The NASDAQ OMX exchanges in Stockholm, Copenhagen, Helsinki, Reykjavik, Tallinn, Riga, and Vilnius will adopt ICB which is the current standard on the NASDAQ OMX exchanges in the US.</p> <p>Affected systems: GCF, FDS, GIW, GIDS</p>
