#### **AWARD-WINNING PRESENTATION BASED ON EXINI SOFTWARE**

**At the EANM congress in Birmingham Asal Shafi gave the best presentation in the Technologist Oral Presentation Sessions and was awarded the "Covidien European Technologist Award 2011". The winner will receive the prize in a ceremony, November 10, at the University Hospital in Malmö.**

Asal Shafi, biomedical analytic (BMA) at the University Hospital in Malmö (UMAS), was awarded the prize for best presentation in the Technology Oral Presentation Session at the annual congress of EANM in Birmingham. Asal presented a study which meant that the technologists automatically can determine if a patient requires additional images of a bone scan. The study was conducted with 40 training cases, which were processed in a version of EXINI bone™, and showed very good results.

This means that the technologists in a greater extent can determine if additional images need to be taken, which in turn causes a further optimization of the workflow and work environment, an important target when using EXINI products.

An award ceremony will be held at UMAS in November 10 where Asal Shafi will receive the prize - "Covidien European Technologist Award 2011".

#### **About EXINI Diagnostics AB (publ)**

EXINI Diagnostics AB (publ) offers advanced solutions for medical decision support to hospitals worldwide. The system is based on advanced image analysis by artificial intelligence and can make its own interpretation of radiology images and provide diagnostic suggestions. In this way the system is used as a decision support for the diagnosing doctor. EXINI is working with products for the diagnosis of some of the most frequent endemic diseases such as coronary heart disease, cancer, dementia and Parkinson's disease. The company was founded in 1999 by Professor Lars Edenbrandt and currently has 13 employees. EXINI is listed on the stock market NASDAQ OMX First North and has about 400 shareholders. Principal owner is Bo Håkansson. Thenberg & Kinde Fondkommission AB acts as Certified Adviser.
