

Rejlers completes the acquisition of Ramböll Finland's consultancy operations to the energy- and industry sector

(REJL B)

Rejlers' subsidiary in Finland has completed the acquisition of the consultancy operations within automation and electricity from Ramböll Finland Oy. The acquired operations had in 2011 a turnover of about EUR 5.5 million and have about 70 employees.

The acquisition strengthens Rejlers' opportunities to offer engineering consultancy services to the customer groups Industry and Energy and significantly expands Rejlers' services in Finland. Rejlers has about 430 employees in Finland after the acquisition.

Through recruiting new staff and implementing strategic takeovers Rejlers will reach the objective to employ at least 2,015 employees and have a turnover of at least SEK 2,015 million by 2015.
