

Anoto Group

January- September 2008 Interim Report

- In the first nine months of 2008 net sales amounted to MSEK 126 (124). The same period in 2007 included non-recurring revenues of MSEK 37 connected to the settlement when divesting our U.S. subsidiary, as well as revenue from DNP in Japan. Third quarter net sales were MSEK 50 (38).
- The gross margin for January – September was 71% (76) and the gross profit was MSEK 89 (94). Adjusted for the non-recurring revenues, the gross profit increased by MSEK 25. Third quarter gross margin was 68% (83) and the gross profit was MSEK 34 (31).
- Excluding depreciation, write-downs and amortization, the result of the first nine months in 2008 was MSEK -14 (6). For the third quarter it was MSEK 1 (1).
- The loss after tax for the first nine months was MSEK -28 (-5). The third quarter result was MSEK 0 (-1).
- Earnings per share for the first nine months of 2008 were SEK -0.22 (-0.04). The third quarter earnings were SEK 0.00 (-0.01).
- The cash flow during the period January-September amounted to MSEK -94 (-20). The third quarter cash flow amounted to MSEK -37 (-8).

Summary of the activities during the third quarter

- Sales improved by 34% compared to the same period last year.
- The cash position went down due to increase in inventory, accounts receivables and capital expenditures. These increases are mainly due to the acquisition of the Hitachi Maxell digital pen division and the improved sales volume in third quarter.
- Going forward the cash position will improve in conjunction with stronger sales and we see no need for a capital injection.
- The third quarter of 2008 is the first quarter ever that Anoto delivered a break-even result after tax, based on ordinary core-business.

- With effect from the third quarter, Anoto entered into a joint venture agreement with Hitachi Maxell concerning the Japanese and Asian markets and acquired the Hitachi Maxell digital pen division. This will give Anoto increased sales and profits since Anoto now controls the major part of the value chain (pen, license and pattern).
- In accordance with the agreement signed with Group Hamelin, we have commenced our deliveries of pens in September 2008.
- The Anoto Functionality Conference was held at the Hilton Hotel Malmö, on 8-10 September. The participants were Anoto partners, end customers and other key people within the industry. This year's conference attracted close to 200 participants from 29 countries around the world.
- Imaging Technology continues to show strong growth during 2008.

Comments from CEO Anders Norling

Break-even result in Q3 and the turn-around is ongoing

The turn-around of Anoto, from a technically oriented organisation to an organisation with customer needs in focus is in line with my plans and has been successful. Since the acquisition of the Hitachi Maxell digital pen division last summer, we can now offer our customers and partners complete solutions within our core businesses, Anoto Products and Technology & Licensing.

Our activities during the first nine months of 2008, such as the development of the next generation digital pen, the acquisition of Covelus router technology, acquisition of Hitachi Maxell Digital Pen Division and a substantial increase in working capital have reduced our cash by MSEK 79.

The acquisition of the Hitachi Maxell Digital Pen Division included all their related intellectual property rights, tools and inventory as well as commercial contracts. This has reduced our cash by MSEK 28. A major part of that amount is finished goods in inventory, ready to be delivered.

As I foresee increased sales of pens resulting in a reduction of the inventory and limited capital expenditures, I expect that our cash flow will improve.

During the third quarter great efforts were made transferring know-how and production of the digital pen from Hitachi Maxell to ourselves. The transfer is going according to plan and we expect reduced production costs of goods as well as reduced operational costs. I expect that the OPEX level from next year will be in line with the level we had in 2007.

Excluding the non-recurring revenue of MSEK 37 in the first nine months of 2007, sales rose by 45%. However, operations did not meet our plans during the first two quarters, primarily due to delayed activities in the Japanese market. Sales in the third quarter were in line with our expectations even though the sales in the Japanese market are still a disappointment.

The third quarter of 2008 is the first quarter ever that Anoto delivered a break-even result after tax, based on ordinary core-business. I expect that all the efforts we have put into the turn-around will result in a more steady and profitable phase going forward.

Organisation

The Anoto organisation is divided into three areas.

- Anoto Products
- Technology and Licensing
- Imaging Technology

Anoto Products

Amounts in MSEK	January-June	June-September	January-September
Net sales 2008	38	17	55
2007	29	27	56
Gross profit 2008	26	13	39
2007	23	24	47

Anoto Products focuses on systems, products and services that target businesses, primarily in the field of forms processing. Anoto has an indirect business model and markets its products through partners, such as system integrators, software developers and IT consulting firms, all of which offer customised solutions with Anoto technology to their corporate customers. Turnkey products, such as existing scanning and translation pens, as well as newly developed products including Anoto PenPresenter, may also be marketed through other sales and distribution channels.

Anoto Products continues to grow, although at a slower pace than expected. The main reason is a slower than expected development of the Japanese market, where major projects are being postponed into 2009. On the positive side, we see steady growth in the important health care and pharmaceutical markets as well as within the areas of inspections and audits.

A soft launch in Scandinavia of the Anoto PenPresenter, an interactive meeting room tool and PowerPoint presentations enhancer, has started through selected channels. The European and US rollout is scheduled for the first quarter of 2009.

The third version of the platform (AFS 1.2) was launched at the end of October. Major new features include support for dynamic data printed on form copies, support for Print on Demand as an alternative to batch print and other additional user scenarios.

British Airways uses the Anoto's Digital Pen and Paper technology to help keeping their flight schedule at London's Heathrow airport. The Anoto's digital pens enable aircraft dispatchers to communicate mission-critical information securely from airside directly to the control centre, ultimately allowing the plane to take off on time.

Sales of C Tech's C-Pen and Pay Pen scanning pens are performing according to plan.

Technology and Licensing

Amounts in MSEK	January-June	June-September	January-September
Net sales 2008	11	15	26
2007	43	3	46
Gross profit 2008	10	8	18
2007	33	3	36

Within Technology and Licensing the Anoto technology is used to develop customer proprietary products. These products, which are based on a combination of digital material (books, cards, etc.) and digital pens that permit immediate feedback by means of speech, sound, etc., have targeted end customers up to this point. The concept supports learning and teaching products that are simple, intuitive and entertaining for the user. Anoto's strategy is to focus on the corporate market rather than the general consumer market.

LeapFrog Tag Reading System, launched earlier this year, is now available through retail channels and sales have developed well. The product is now available on markets in North America, Europe and Australia. Since Leapfrog has prepaid the royalty, the sales volume has no impact on the Anoto's cash flow.

Development of technology and digital pens toward the area of visual communication products such as whiteboards and flipcharts is proceeding according to plan.

Sales of the Pulse™ smartpen by Anoto Partner Livescribe is reported to be better than expected in channels such as Target, Target.com, Amazon.com, and major college and university bookstores. Anoto receives royalty per pen sold.

Since September we have delivered the majority of pens to Hamelin, a leading European manufacturer of stationery and office supplies, in accordance with the initial contract. The digital pens are the key component of Hamelin's new Papershow product, which turns a paper notepad into an easy-to-use interactive whiteboard.

Imaging Technology

Amounts in MSEK	January-June	June-September	January-September
Net sales 2008	26	18	44
2007	14	8	22
Gross profit 2008	19	13	32
2007	8	3	11

Imaging Technology develops and markets basic Anoto technology like ASICs and IP blocks. The application area supplies and licenses Imaging Technology modules, components and function blocks for integration with customer products or components; including mobile phones, accessories and their components.

Sales of mobile phones containing Anoto video technology have ramped up throughout 2008 and are expected to continue to grow in volumes following the market of advanced mobile phones.

Imaging Technology performed according to plan and sales doubled compared to 2007. The increase is due to greater use of our video technology in mobile phones and other products.

We continue to seek business opportunities in collaboration with new and existing customers and partners.

Net sales per application area Jan - Sept 2008

Net sales per applicaton area Jan - Sept 2007

Gross profit per application area Jan - Sept 2008

Gross profit per application area Jan - Sept 2007

Net sales per revenue category Jan-Sept 2008

Nets sales per revenue category Jan - Sept 2007

Third quarter 2008 in numbers

Sales and earnings for the third quarter (June-September)

Third quarter sales were MSEK 50 (38).

The gross profit was MSEK 34 (31), and the gross margin was 68% (83).

Excluding depreciations amortization and write-downs, the profit was MSEK 1 (1).

Selling and administrative expenses, as well as research costs, amounted to MSEK -41 (-33), of which depreciations amortization and write-downs accounted for MSEK -4 (-3).

The third quarter operating loss was MSEK -3 (-2).

Cash flow for the third quarter (June-September)

Cash flow from operating activities totalled MSEK -25 (-3) for the third quarter.

Net cash flow amounted to MSEK -37 (-8), whereof net investment affected the quarter's cash flow of MSEK -13 (-7) and the increased inventory by MSEK -17 (-2).

Financing and liquidity

At the close of the third quarter, the group's cash amounted to MSEK 37 (160), inventory MSEK 37 (5), accounts receivable MSEK 39 (15) and accounts payable MSEK 15 (11).

Anoto Group AB

As a pure holding company, Anoto Group AB has a limited number of corporate functions and employees. Third quarter sales were MSEK 7 (5), while the pre-tax profit was MSEK 1 (0). At the close of the quarter, liquid assets, including current investments, amounted to MSEK 1 (90). Investments came to MSEK 0 (0).

Accounting policies

This interim report was prepared in accordance with IAS 34, Interim Financial Reporting. For information about the accounting policies applied refer to the 2007 annual report. The accounting policies are unchanged from those applied in 2007.

Risk factors and uncertainties

No significant additional risks are deemed to have arisen beyond those described in the 2007 annual report for the Anoto Group. (Please see Note 2 for a detailed presentation of the company's risk exposure and management.)

Share data

The company's share is listed on the OMX Nordic Small Cap Index in Stockholm. Shares numbered 128,583,867 at the end of the second quarter, in addition to which 3,515,500 warrants were outstanding, of which 0 were deemed to have a value as of 30 September 2008.

Option programmes

The parent company has issued options as part of various incentive programmes. Full exercise of all remaining programmes would result in dilution of about 2.7%.

Outlook

Anders Norling, CEO

I foresee a promising future with increased profits and an improved cash flow due to the fact that we now are close to complete a major and costly turn-around of the business of Anoto. The acquisition of the digital pen business, the restructuring from a technically to a customer orientated company, packaged products offerings, have moved the company higher up in the valuechain. We can now offer our customers more complete products, including technical solutions, a software platform and the digital pen.
