

Rejlers designs new catenary on mainline Stockholm - Malmö

(REJL B)

Rejlers receives a new assignment from Banverket to design new catenary system for the distance Sommen(Mjölby) - Nässjö on the mainline between Stockholm and Malmö.

The assignment includes complete inquiry documents and detailed design for a 250 km/h catenary system adapted for EU standard pantograph. The assignment also consists of detailed design for ground and foundation work as well as adjustment of the signalling system.

The assignment is worth around SEK 6.5 million and will be completed by May 2010.
