

Interim Report

JANUARY – JUNE 2008

License sales increase by 17 percent and continued strong growth in the U.S.

“ReadSoft's business has continued to develop well during the second quarter of 2008. License sales increased by 17 percent, and sales in "the USA and the rest of the world" grew by over 30 percent. The Nordic market, too, had a strong quarter with growth of 23 percent, while growth in the large Central European markets was more gradual.

ReadSoft's EBITDA improved compared to 2007. However, increased depreciation meant that pre-tax earnings were lower compared to the same period last year. Cash flow from the current business was strong and substantially improved compared to last year.

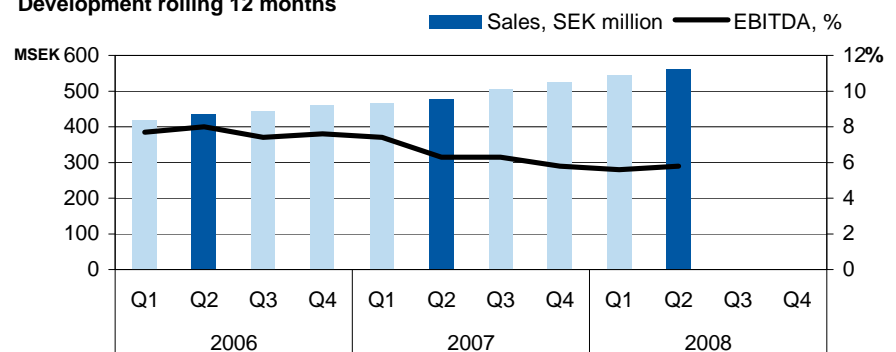

Markets all over the world are unsteady, and many organizations are focusing more and more on finding solutions that reduce their costs. Therefore reasonably negative economic trends could boost sales of strongly cost-cutting products and solutions.”

The license revenue amounted to SEK 56.8 (48.4) million during the second quarter, which is 39 (38) percent of the total revenue. Out of the total license revenue for the second quarter, Trade Process Automation represented SEK 49.2 (37.5) million while SEK 7.6 (10.9) million were from Document Capture Automation. Service fees amounted to SEK 37.5 (35.3) million. In addition, revenues for training and customer-specific development were SEK 40.0 (33.5) million. Hardware sales (scanners) amounted to SEK 7.2 (7.9) million. Other revenues amounted to SEK 3.3 (2.5) million.

In the Nordic countries the sales totaled SEK 44.3 (36.1) million. The company's sales in the other parts of Europe amounted to SEK 62.5 (62.5) million. In the U.S. and the rest of the world sales amounted to SEK 37.9 (29.0) million.

Key developments during the second quarter

The quarter took off with the announcement that **one of the larger corporations in South East Asia** is investing in electronic invoice processing from ReadSoft. The value of the agreement is 420,000 EUR and covers the processing of 400,000 invoices annually. The ReadSoft solution will automatically process the invoices received and integrate with the installed SAP system.

ReadSoft continued to win major SAP accounts payable automation projects in the North American market during the second quarter 2008. Among them was **a U.S. based Fortune 500 company** within the industrial/service sector that decided to invest \$1.25M USD in ReadSoft's solution, one of ReadSoft's largest deals ever. The implementation will be made at corporate facilities in the U.S., Canada, Spain, Asia and Latin America. Only a week after the closing of this deal ReadSoft won yet another major SAP accounts payable automation project on the very competitive North American market. This time, **a U.S. based company within paperboard packaging solutions** decided to invest \$820,000 USD in ReadSoft's solution. The implementation will be made at the company's facilities in the U.S..

ReadSoft also won a number of larger deals in Sweden during the quarter. Among them was **a Swedish state authority** that chose to automate the input of the 650,000 supplier invoices it receives annually by connecting ReadSoft's INVOICES to its existing SAP business system. The order is worth over 215,000 EUR. **Länsförsäkringar AB** was the first company in Sweden to invest in CLASSIFY and INDEX in order to automate handling of more than 2 million documents annually. Besides cutting costs, the investment also gives the companies in the group the ability to provide customers with a more efficient service, and facilitates the group's future growth.

The Stiebel Eltron Group, a leading manufacturer of domestic and system technology, has implemented the SAP-certified solution ReadSoft DOCUMENTS for Invoices to process 70,000 invoices annually. The software will automate - and thereby accelerate - the processes in the Accounts Payable department and increase transparency. ReadSoft received an additional order worth approximately 350,000 EUR from **a large French chemical Group** during the quarter. The order is an upgrade of the agreement signed and announced in November 2007.

Going forward

We assess that the market for our solutions will continue to be good. ReadSoft's long-term financial targets are 20-25 percent annual growth and an operating margin (EBITDA) of at least 15 percent.

Reports for geographic segments

ReadSoft is represented on five continents which give us the ability to deliver global solutions to multinational companies as well as local companies that are specialized in a particular market or industry. ReadSoft's partners often have supplemental products and are resellers in markets where we do not have our own sales force, or they collaborate with our sales force. We have a need to be able to deliver our own complete solutions with both products and support for large customers, particularly in less mature markets. In more mature markets, we often work with our partners.

The Nordic Region

In the Nordic region, where the majority of sales take place via partners, ReadSoft has subsidiaries in Sweden, Norway, Denmark and Finland. During the first six months of 2008 sales in this region increased to SEK 81.0 (67.4) million. The twelve month rolling sales total was SEK 157.7 (135.0) million.
